The Domain of Language Michael D. Fortescue, 2002 This book is intended as counter evidence to the perception of Linguistics as the domain of dusty schoolroom grammar where proponents of one theoretical orientation or the other spend their brief breaks in the playground bashing the others over the head with their favorite abstractions The discipline may appear to outsiders as fragmented and worse still lacking in relevance to the real world outside its gates The purpose is to show that Linguistics in all its varied branches can be entertaining as well as thought provoking and that its domain is indeed a coherent one despite all the internecine squabbling The subject is introduced in an unconventional way as a kind of fable with an historical moral that professional linguists as well as students should enjoy as a commentary on the state of the discipline today

The Possibility of Language Alan K. Melby, C. Terry Warner, 1995 This book is about the limits of machine translation It is widely recognized that machine translation systems do much better on domain specific controlled language texts domain texts for short than on dynamic general language texts general texts for short The authors explore this general domain distinction and come to some uncommon conclusions about the nature of language Domain language is claimed to be made possible by general language while general language is claimed to be made possible by the ethical dimensions of relationships Domain language is unharmed by the constraints of objectivism while general language is suffocated by those constraints Along the way to these conclusions visits are made to Descartes and Saussure to Chomsky and Lakoff to Wittgenstein and Levinas From these conclusions consequences are drawn for machine translation and translator tools for linguistic theory and translation theory The title of the book does not question whether language is possible it asks with wonder and awe why communication through language is possible

Safety-Critical Systems: The Convergence of High Tech and Human Factors Felix Redmill, Tom Anderson, 2012-12-06 Safety critical systems in the sense of software based systems used in safety critical applications are high tech They are products of modern technology Their effective efficient and safe

functioning depends not only on the development of the right technologies but also on the right use of them. The safety of a system may be compromised not only by faults in the system but also by the use in the first place of an unreliable, unsafe or unproved technology in its development. The key to the development and use of both technologies and systems is the human being. Until recently the importance of human involvement other than at the direct operational level was hardly admitted. But now the unreliability of humans is recognised as is the potential for latent faults to be introduced into systems at any point in their life cycles by all who are involved with them including designers and strategic decision makers.

The Domain of Language Michael Fortescue, 2004. This book is intended as counter evidence to the perception that Linguistics is a domain of dusty schoolroom grammar. It follows that linguistics can be characterised differently than as proponents of theoretical orientations who spend their brief breaks from their bone dry work bashing each other over the head with their various favourite abstractions. The discipline may appear to outsiders as fragmented and worse still lacking in relevance to the real world outside its gates. This book demonstrates that Linguistics in all its varied branches can be entertaining as well as thought provoking and that its domain is indeed a coherent one despite all the internecine squabbling. In an unconventional way Michael Fortescue introduces his subject as a kind of fable with a historical moral that professional linguists as well as students should enjoy as a useful commentary on the state of the discipline today. He is a professor of Linguistics at the University of Copenhagen. He is the author of *London* 1998 and *Amsterdam Philadelphia* 2001.
