## **Domestic Tranquility:**

Domestic Tranquility F. Carolyn Graglia, 1998 The author argues that the principal target of feminist fire in the on going gender wars is not men but traditional wives and mothers She exposes feminism s totalitarian impulse and its contribution to the tangle of pathologies that have left marriage and family life in tatters *The Presidency in Times of Crisis and Disaster* Brian M. Harward, 2019-11-15 This resource uses primary documents and contextualizing essays to illuminate how America s presidents have responded to major tests of their leadership and approached their role and responsibilities in times of national crisis Presidents hold the attention of the public like no other political actor In addition because of their unique role in the constitutional system presidents often take immediate unilateral action in the face of national emergencies Exploring key events crises and disasters through the lens of presidential responsiveness this text reveals not only the larger historical context but also the authority of presidents in meeting the felt necessities of the time deepening readers understanding of those touchstone events Comprehensive in temporal and topical scope the book covers crises and disasters from the presidency of George Washington through Donald Trump s first two years in office Important events covered include natural disasters wars assassinations terrorist attacks mass shootings economic crises riots tragedies and political scandals Each event is explored through a primary document that reveals key dimensions of the presidential response to the crisis or disaster in question and contextual headnotes and essays that provide additional insights into the political economic and cultural contexts in which that event occurred and to which the president responded **The Revolution, the Constitution, and America's Third Century, Vols. 1-2** American Academy of Political and Social Science, 2015-09-30 A distinguished group of judges scholars political leaders lawyers and representatives of groups in the private sector who convened in Philadelphia in 1976 reexamine the Constitution and our system of government exploring its implications for the present and future **Capitalism and The Social Contract** Edmond Streete, It s important to say There s Nothing Wrong with Making Money It s critical to establish that before this begins Financial health is a big weight on people s minds From earnings and wealth building to community status and standing people are concerned about their coin They want protections for their purchase ability and security in their savings And knowledge that everyone is playing on the same a level field People are nervous about the health and safety of their money about inflation and value Concerned with the influence and power which comes with the accumulation of wealth resources Which begs a question How does one manage it all Whether you have it or are trying to get it How do you balance the desire to acquire wealth with the protections of the social order Remember it s not explicitly promised in the declaration everyone will have money Though the constitution reads We the People **Hearings, Reports and Prints of the Senate Committee on Public Works** United States. Congress. Senate. Committee on Public Works, 1970 **Is the United States Worth Saving?** Charles W. Thompson, 2013-05-10 The books premise spells out the dangers which our republic has encountered and how the 21st century presents new hurdles to

surmount and reclaim our democracy The author focuses on 10 conditions which have eroded representative government and offers proposals to cement public control over government Among the problems there has been a slow insidious alteration in methods for the selection of representatives which are encapsulated in the words gerrymandered electoral districts and representatives for sale Results of this condition are legal breaks tax loopholes and regulatory exemptions favoring a few This problem is exacerbated by the publics disenchantment with politics Added to the problem are growing trends in our social mores which reveals more attention to good times than social obligations of citizenship and reflected in the low voting rates of eligible voters The author points out how history repeats itself and how internal divisiveness destroys national unity Stressed throughout the book is the vital nature for universal education and how the vast wealth of intellectual ability in our nation has been overlooked The book also points out the difficulty for people to realize how vastly different the 21st century is when compared only to the lives of our great grandfathers The growth of multinational corporations and the rise of State Capitalism alters concepts of free competitive enterprise which faces daunting challenges for survival The growth of our nation and the free movement of people have resulted in nearly one in three Americans living in four states but our representative system is still tied to 1789 Significant suggestions are also proffered to protect the independence of our judiciary The author offers several proposals for consideration to redeem and enhance our republic why our governmental units federal state county and city must be aligned to achieve our purpose to improve and protect the human condition and liberty A significant point is made of the importance of our experiment in democracy for the world **Boston**
