Baldwin,2006 This paper addresses the final steps to global free trade the political economy forces that might drive them and the role the WTO might play in guiding them Two facts form the departure point 1 Regionalism is here to stay 2 the motley assortment of regional trade agreements is not the best way to organise world trade Moving to global duty free trade will require a multilateralisation of regionalism The paper presents the political economy logic of trade liberalisation and uses it to structure a narrative of world trade liberalisation since 1947 The logic is then used to project the world tariff map in 2010 arguing that the pattern will be marked by fractals fuzzy leaky trade blocs made up of fuzzy leaky sub blocs fuzzy since the proliferation of FTAs makes it impossible to draw sharp lines around the 3 big blocs and leaky since some FTAs create free trade canals linking the blocs The paper then presents a novel political economy mechanism spaghetti bowls as building blocs whereby offshoring creates a force that encourages the multilateralisation of regionalism Finally the paper suggests three things the WTO could do to help multilateralise regionalism **Software Engineering** Theodore Gyle Lewis,1982 Specifications and Drawings of Patents Issued from the U.S. Patent Office United States.
