Donovans Brain 1953:

The Biology of Science Fiction Cinema, 2d ed. Mark C. Glassy, 2024-12-24 Science fiction cinema has dramatically affected the perception of science by the general population. If science fiction and actual science sometimes seem at odds, they importantly share the elements of curiosity, creativity, and imagination, and there are many examples of yesterday's science fiction becoming today's science. This book explores the imaginative elements of biology seen in 20th-century science fiction films. Written by a professional scientist and science fiction lover, this second edition includes recent updates of biomedical science and science fiction cinema. It covers different categories of biology: biochemistry or molecular biology and medicine, each subcategorized into chapters such as cell biology, hematology, and dermatology. Within each chapter are several film examples explaining the biological sciences, principles involved, what is right and what is wrong with the science, and what changes could be made for the science of the film to become a reality.

The Fragment William Tronzo, 2009 The universe may well have begun with an immense act of fragmentation: the big bang that sent particles flying in all directions to perform spectacular acts of creation and destruction. The fragment, volatile and unpredictable, is not simply the static part of a once-whole thing but itself something in motion. Drawing upon art history, archaeology, literature, numismatics, philosophy, and film, this book explores the significance of the fragment and addresses the powerful drives that have impelled it into the cultural mainstream. Pretend We're Dead Annalee Newitz, 2006-07-17 *DIVAN* An examination of how monster narratives and horror stories serve as allegories for anxieties about capitalism in American popular culture. *div*

Neuroscience in Science Fiction Films Sharon Packer, M.D., 2014-11-20 As the gap between science fiction and science fact has narrowed, films that were intended as pure fantasy at the time of their premier have taken on deeper meaning. This volume explores neuroscience in science fiction films, focusing on neuroscience and psychiatry as running themes in SF and finding correlations between turning points in neuroscience fiction and advances in the scientific field. The films covered include *The Strange Case of Dr. Jekyll and Mr. Hyde*, *The Island of Dr. Moreau*, *Robocop*, *The Stepford Wives*, *The Mind Snatchers*, and iconic franchises like *Terminator*, *Ironman*, and *Planet of the Apes*. Examining the parallel histories of psychiatry, neuroscience, and cinema, this book shows how science fiction films offer insightful commentary on the scientific and philosophical developments of their times.

Keep Watching the Skies! Bill Warren, 2009-11-30 Bill Warren's *Keep Watching the Skies!* was originally published in two volumes in 1982 and 1986. It was then greatly expanded in what we called the 21st Century Edition with new entries on several films and revisions and expansions of the commentary on every film. In addition to a detailed plot synopsis, full cast and credit listings, and an overview of the critical reception of each film, Warren delivers richly informative assessments of the films and a wealth of insights and anecdotes about their making. The book contains 273 photographs, many rare, 35 in color, has seven useful appendices, and concludes with an enormous index. This book is also available in softcover format. ISBN 978 1 4766 6618 1

Sci-Fi Film Fiesta Chris Christopoulos, 2023-01-23 This

9th volume Accidents Experiments of the Sci Fi Film Fiesta eBook series features classic science fiction films from the 1950s whose subject matter involves discoveries and breakthroughs made through experiments or even by sheer accident The important point about such discoveries though are the consequences that result from them The collection of entertaining cautionary sci fi screen tales from the 1950 s raise interesting questions about humanity s drive to command control and master nature and treat it as if it exists purely for our own benefit while often ignoring the price to be paid for doing so
