Enabling People-Centered Risk Communication for Geohazards

Alessandro Amato, Sally H. Potter, Anna Scolobig, Eric M. Thompson, 2024-07-18 In the field of natural hazards communicating science with the public and stakeholders involves entering the challenging and complex world of hazard and risk communication the ultimate purpose of which is to reduce the impact of impending hazards on people at risk According to the Sendai Framework 2015 2030 it is important to strengthen the utilization of media including social media traditional media big data and mobile phone networks to support national measures for successful disaster risk communication Sometimes risk communication has collateral and unexpected side effects that may lead to the adoption of inadequate behaviors In some instances this can even result in legal actions being taken against scientists and or emergency managers The role of the media should be to facilitate the accurate communication of hazard and risk information but such communication is often hampered by the fact that journalists have different agendas and priorities than scientists risk communicators and emergency managers This does not always support people in their decision making Accurate communication of hazard and risk is especially important when decisions have to be made within contexts where uncertainty is very high This is often the case with geohazards such as earthquakes tsunamis volcanic eruptions and landslides

[The Politics of New Atheism](#) Stuart McAnulla, Steven Kettell, Marcus Schulzke, 2018-07-04 New atheism is best known as a literary and media phenomenon which has resulted in the widespread discussion of the anti religious arguments of authors such as Richard Dawkins Sam Harris and Christopher Hitchens yet it also has strongly political dimensions This book analyses the political aspects of new atheism and offers an analysis that is informed by insights from political science and political theory The authors locate new atheism within a diverse history of politically oriented atheisms It is argued the new atheist

movement itself contains a considerable variety of political viewpoints despite coalescing around forms of secularist campaigning and identity politics New atheist views on monotheism public life morality and religious violence are examined to highlight both limitations and strengths in such perspectives Conservative feminist and Marxist responses to new atheism are also evaluated within this critical analysis The book rejects claims that new atheism is itself a form of fundamentalism and argues that the issues it grapples with often reflect wider dilemmas in liberal left thought which have ongoing relevance in the era of Trump and Brexit It will be of great interest to researchers and scholars in the fields of new atheism political atheism secularism non religion and secular religious tensions

Landrum, 2022-02-11 **The United States Patents Quarterly**, 2012-04 Report of cases relating to patents trade marks copyrights decided by Supreme Court of the United States United States Circuit courts of appeals District courts of the United States United States Court of Customs and Patent Appeals Court of Claims of the United States United States Court of Appeals for the District of Columbia Commissioner of Patents and Patent Office Board of Appeals *California's Recall Election of Gavin Newsom* Larry N. Gerston, Mary Currin-Percival, Garrick L. Percival, 2022-08-02 California went through a political earthquake of sorts when the state recalled Governor Gray Davis in 2003 In 2021 the state faced another political turning point with the threatened recall of Governor Gavin Newsom Less than two years after Newsom's overwhelming election victory more than two million Californians signed on to the recall effort hoping to expel him from office in a special election How could such a monumental turnabout be possible Normally the political headwinds would be much too strong for a movement to oust a governor who had decisively vanquished his opponent But with the COVID 19 pandemic dominating every aspect of society including politics these weren't normal times Organizing a recall election is a demanding enterprise it takes abundant political energy tremendous amounts of anger with the status quo and mounds of money Yet for the second time in less than two decades such wheels were set in motion What is it that makes California so dynamic yet so fragile This book explains that paradox and in the process enlightens readers about the recall process the challenges of federalism and the pitfalls of direct democracy It examines the underlying conditions that expose a state with poorly linked institutions a bitterly divided society and a governor who had to act under nearly impossible conditions demonstrating his strengths and vulnerabilities along the way It's a story that could happen only in California a state with a history of only stories Designed to be useful in a variety of college courses this book is the first to unveil the Newsom backstory and will appeal to pundits and politicians as well as interested general readers
