Managing Web-Enabled Technologies in Organizations: A Global Perspective Khosrow-Pour, D.B.A., Mehdi, 1999-07-01 Technological advancements of the past several decades in computer and telecommunication technologies have had a profound impact upon the fundamental structures of society and particularly upon organizations As these technologies have matured and developed many organizations have been looking into the organizational and managerial changes that can be made that allow the organization to achieve greater utilization of these technologies to improve their competitive postures Web enabled technologies have become a serious contender Many global organizations are looking into the emerging web enabled technologies to make their dispersed operations around the world more efficient and maintaining greater control over their resources Those organizations that have not attempted to identify and master the many applications of web enabled technologies will have serious difficulty competing and surviving This book gives you the latest research findings writings related to the web enabled technologies utilization and management in organizations throughout the world

How to Win Customers in the Digital World Peter Vervest, Al Dunn, 2012-12-06 Every organisation must strive for Total Action Winning the customer in today s highly competitive and demanding world is the key to ensuring success All managers and employees profess to understand this yet they find it incredibly difficult to perform together to achieve this The digital world is changing the traditional logic of business we must now act fast and effectively to capture and retain increasingly demanding and sophisticated customers be they individuals or organisations Most customers demand much more than many organisations are able to deliver It is said that the inventor of the telephone believed its main use would be to let someone know that a telegram was arriving Today we know there is a lot more you can do with a telephone and all the surrounding digital business technologies But you must be prepared to re think why you are doing things the way you are And why you are doing them at all This is the starting point for How to win customers in the digital world Total Action or Fatal Inaction The authors confront traditional ways of organising with the capabilities of the new digital business technologies They are critical of the frozen behaviour of today s large organisations They go back to the

fundamental goal that business is about making money by satisfying customers *Doing Business on the Internet* Fay Sudweeks, Celia T. Romm, 2012-12-06

FAY SUDWEEKS AND CELIA ROMM At the turn of the twenty first century global communication is changing the fabric of society at a rate never experienced before The Internet in particular has redrawn the map of global economy To be competitive in today's marketplace companies need to expand commercial activities beyond national borders The global network of electronic infrastructure has played a significant role in this expansion but the technology itself is not the factor driving the business revolution The changes are driven by the interaction of information technology and customer demand Customers are not only adapting to new technologies they are demanding more and more global competition Electronic commerce therefore is arguably the most important economic trend of our time Its presence on the Internet in particular is becoming crucial to the effective functioning of organisations especially in a world where companies need to deal with suppliers customers partners and their own units distributed across the world A global business industry created by the Internet is no longer a projected vision of technocrats it is a reality The Internet is already playing a significant role in determining corporate strategy and in creating values

Munro, 1999-08-13 This volume examines how people deal with information in a computerized environment looking at what happens when people actively explore information space looking for objects without specific goals in mind The topics are particularly relevant to the industrial application of computer supported cooperative work CSCW techniques especially with regard to teleworking and virtual organizations This volume will be useful for researchers

interested in human computer interaction virtual communities and information visualization **Singapore Inc** Linda Low, Douglas M. Johnston, 2001 Singapore's quick recovery from the recent economic crisis is attributed to its strong public policies. This book suggests further strengthening of the country's public policy in order to improve its competitive edge in the 21st century. The policy issues discussed fall into four broad categories. Economic and Technological Policy includes an analysis of how the Singapore economy fared under the recent regional economic crisis and explores how it meets the twin calls of globalisation and regionalisation. Fiscal and Regulatory Policy includes a discussion of current trends in government revenue and expenditure policy and the country's regional role in containing land forest fires in Southeast Asia. Resource Development and Management Policy discusses the issue among others of the human resource and employment challenges Singapore faces in the context of the knowledge based economy. Educational and Social Policy includes a description on how overseas education augments and complements local education in Singapore. **Wide Area Workflow Management** Gerold Riempp, 1998-08-12 Although the use of computers and the Internet is now widespread in business inter and intra organizational workflow is still predominantly paper based. This volume looks at how business processes can be streamlined and integrated via Wide Area Workflow Management (WAWM) and how as a result business relationships can be made more effective and efficient. Covering both technical and managerial issues in the field of Wide Area Workflow Management this volume provides a much needed overview for researchers practitioners consultants and managers.
