## **Don DeLillo The Physics Of Language:**

**Don DeLillo** David Cowart,2012-08-15 Don DeLillo author of twelve novels and winner of the National Book Award the PEN Faulkner Award the William Dean Howells Medal and the Jerusalem Prize has begun to rival Thomas Pynchon as the definitive postmodern novelist Always thought provoking and occasionally controversial DeLillo has become the voice of the bimillennial moment Charting DeLillo s emergence as a contemporary novelist of major stature David Cowart discusses each of DeLillo s twelve novels including his most recent work The Body Artist 2001 Rejecting the idea that DeLillo lacks affinities across the cultural spectrum Cowart argues that DeLillo s work invites comparison with that of wide range of antecedents including Dunbar Whitman Wittgenstein Heidegger Freud Lacan Derrida Hemingway Joyce Rilke and Eliot At the same time Cowart explores the ways in which DeLillo s art anticipates parallels and contests ideas that have become the common currency of poststructuralist theory The major site of DeLillo s engagement with postmodernism Cowart argues is language which DeLillo represents as more mysterious numinous even than current theory allows For DeLillo language remains what Cowart calls the ground of all making Don DeLillo The Physics of Language is a provocative investigation of the most compelling issues of contemporary fiction

Reading America Elizabeth Boyle,2009-03-26 This specially commissioned volume of essays offers a refreshing and unusual perspective on classic novels from the American literary canon Accessible to students scholars and the interested reader this engaging collection explores familiar novels through unfamiliar lenses and in so doing sheds light on surprising and previously overlooked aspects of each text Reading America presents a new approach to American literature by showcasing a cross section of recent research into previously un tapped areas of interest Each chapter attempts to re read classic American texts using new or unorthodox theoretical frameworks including such diverse topics as an Emersonian reading of Don DeLillo decoding Thomas Pynchon with eco criticism and understanding Paul Auster s New York Trilogy by exploring the graphic novel version of City of Glass Other authors explored in this way include Henry James Truman Capote Ralph Ellison Toni Morrison Joyce Carol Oates and F Scott Fitzgerald This type of approach widens the reader s knowledge of each well known text and encourages new critical evaluations of contemporary American literature The collection moves through six large topic areas from Naturalism and an idea of the Great American Novel at the end of the nineteenth century through politics sexuality language and nature to a contemporary engagement with postmodernism Each essay deals with its own particular subject and author but the full impact of each on the notion of the American novel as a phenomenon can only be understood when read in conjunction with the others Of interest to both undergraduate and postgraduate students Reading America would be a valuable asset to any American Studies or American Literature degree course and a useful companion to American History or Politics courses The volume will also attract strong interest from established academics especially those researching the fields of literature critical theory cultural history and politics

**Quirks of the Quantum** Samuel Chase Coale,2012-11-07 Episodic and disconnected much of postmodern fiction mirrors

the world as quantum theorists describe it according to Samuel Chase Coale In *Quirks of the Quantum* Coale shows how the doubts misgivings and ambiguities reflected in the postmodern American novel have been influenced by the metaphors and models of quantum theory Coale explains the basic facets of quantum theory in lay terms and then applies them to a selection of texts including Don DeLillo's *Underworld* Joan Didion's *Democracy* and Thomas Pynchon's *Against the Day* Using a new approach to literature and culture this book aims to bridge the gap between science and the humanities by suggesting the many areas where they connect

**Postmodern Belief** Amy Hungerford, 2010-07-01 How can intense religious beliefs coexist with pluralism in America today Examining the role of the religious imagination in contemporary religious practice and in some of the best known works of American literature from the past fifty years *Postmodern Belief* shows how belief for its own sake a belief absent of doctrine has become an answer to pluralism in a secular age Amy Hungerford reveals how imaginative literature and religious practices together allow novelists poets and critics to express the formal elements of language in transcendent terms conferring upon words a religious value independent of meaning Hungerford explores the work of major American writers including Allen Ginsberg Don DeLillo Cormac McCarthy Toni Morrison and Marilynne Robinson and links their unique visions to the religious worlds they touch She illustrates how Ginsberg's chant infused 1960s poetry echoes the tongue speaking of Charismatic Christians how DeLillo reimagines the novel and the Latin Mass why McCarthy's prose imitates the Bible and why Morrison's fiction needs the supernatural Uncovering how literature and religion conceive of a world where religious belief can escape confrontations with other worldviews Hungerford corrects recent efforts to discard the importance of belief in understanding religious life and argues that belief in belief itself can transform secular reading and writing into a religious act Honoring the ways in which people talk about and practice religion *Postmodern Belief* highlights the claims of the religious imagination in twentieth century American culture

**Reassessing the Twentieth-Century Canon** N. Allen, D. Simmons, 2014-06-17 The collection brings together experts in the field of twentieth century writing to provide a volume that is both comprehensive and innovative in its discussion of a set of newly canonical texts The book includes new applications of philosophical and critical thinking to established texts

[Fictions of Fact and Value](#) Michael LeMahieu, 2013-10-02 *Fictions of Fact and Value* argues that the philosophy of logical positivism considered the antithesis of literary postmodernism exerts a determining influence on the development of American fiction in the three decades following 1945 in what amounts to a constitutive encounter between literature and philosophy at mid century after the end of modernism as it was traditionally conceived but prior to the rise of postmodernism as it came to be known Two particular postwar literary preoccupations derive from logical positivist philosophy the fact value problem and the correlative distinction between sense and nonsense Even as postwar writers responded to logical positivism as a threat to the imagination their works often manifest its influence specifically with regard to emotive or meaningless terms Far from a straightforward history of ideas *Fictions of Fact and Value* charts a genealogy that is often erased in the very texts where it

registers and disowned by the very authors that it includes LeMahieu complicates a predominant narrative of intellectual history in which a liberating postmodernism triumphs over a reactionary positivism by historicizing the literary response to positivism in works by John Barth Saul Bellow Don DeLillo Iris Murdoch Flannery O Connor Thomas Pynchon and Ludwig Wittgenstein As LeMahieu compelling demonstrates the centrality of the fact value problem to both positivism and postmodernism demands a rethinking of postwar literary history A trenchantly argued study that unearths an important part of postwar literary history Fictions of Fact and Value will interest anyone concerned with postmodernism modernist studies analytic philosophy or the history of ideas Ideology and Rhetoric Bożenna Chylińska,2009-01-14 The discovery of America and its further development into a modern state and a nation are the clear instance of how ideology and rhetoric are entwined and how they can encompass widely disparate viewpoints The essays collected in this book address the topical issues of modern American Studies cultural difference and otherness gender race and ethnicity class and power They represent new texts and contexts approached through the revision reevaluation and reconfiguration of canons thus accommodating the expectations of the heterodox audience Femininity reconsidered an ideology of passing away in contemporary world of technical development race captured within the framework of identity and gender the rhetoric of blackness approached through racial exploitation American conquest ideology revealed in a mission of Manifest Destiny the 20th century assimilation rhetoric in the relations between Native Americans and the US federal government the conservative ideology and apologetic rhetoric of the Antebellum South the critique of the 21st century American legal system the evolution of the presidential rhetoric which today addresses a large heterogeneous audience all these topics impose a transnational interpretation of American culture which developed as a result of the cross cultural transformation of European culture cultures moulded on American soil to finally become a unique reformulation of the very idea of America itself **The Oxford Encyclopedia of American Literature** Jay Parini,2004 The Encyclopedia of American Literature gathers together 350 essays from over 190 leading scholars on the whole of American literature from European discovery to the present At the core of the Encyclopedia lie 250 essays on poets playwrights essayists and novelists Figures such as Whitman Melville Faulkner Frost and Morrison are discussed in detail with each examined in the context of his or her times an assessment of the writer s current reputation a bibliography of major works and a list of major critical and biographical works about the writer Fifty entries on major works such as Moby Dick Song of Myself Walden The Great Gatsby The Waste Land Their Eyes Were Watching God Death of a Salesman and Beloved place the work in its historical context and offer a range of possibilities with regard to critical approach The Encyclopedia also contains essays on literary movements periods and themes pulling together a broad range of information and making connections between them Each entry has its own primary and annotated secondary bibliography and a system of cross references helps readers locate information with ease The Encyclopedia of American Literature is an outstanding reference source for students studying authors or particular pieces of literature

libraries looking for one comprehensive source and readers interested in American literature its authors and its connection with various areas of study *Don DeLillo* Jesse Kavadlo,2004 Don DeLillo winner of the National Book Award the William Dean Howells Medal and the Jerusalem Prize is one of the most important novelists of the late twentieth and early twenty first centuries While his work can be understood and taught as prescient and postmodern examples of millennial culture this book argues that DeLillo s recent novels *White Noise* *Libra* *Mao II* *Underworld* and *The Body Artist* are more concerned with spiritual crisis Although DeLillo s worlds are rife with rejection of belief and littered with faithfulness estrangement and desperation his novels provide a balancing moral corrective against the conditions they describe Speaking the vernacular of contemporary America DeLillo explores the mysteries of what it means to be human **Writing Our Extinction** Patrick Whitmarsh,2023-04-11 Mid twentieth century developments in science and technology produced new understandings and images of the planet that circulated the globe giving rise to a modern ecological consciousness but they also contributed to accelerating crises in the global environment including climate change pollution and waste In this new work Patrick Whitmarsh analyzes postwar narrative fictions that describe depict or express the earth from above the aerial and below the subterranean revealing the ways that literature has engaged this history of vertical science and linked it to increasing environmental precarity up to and including the extinction of humankind Whitmarsh examines works by writers such as Don DeLillo Karen Tei Yamashita Reza Negarestani and Colson Whitehead alongside postwar scientific programs including the Space Race atmospheric and underground nuclear testing and geological expeditions such as Project Mohole which attempted to drill to the earth s mantle As Whitmarsh argues by focusing readers attention on the fragility of postwar life through a vertical lens Anthropocene fiction highlights the interconnections between human behavior and planetary change These fictions situate industrial history within the much longer narrative of geological time and reframe scientific progress as a story through which humankind writes itself out of existence **Approaches to Teaching DeLillo's White Noise** Tim Engles,John N. Duvall,2006 Don DeLillo s satiric novel *White Noise* prophetic in 1985 about American society s rampant consumerism information overload overreliance on the media and environmental problems may seem to today s students simply a description of their lived reality The challenge for teachers then is to help them appreciate both the postmodern qualities of the novel and its social critique [South Atlantic Review](#) ,2004 **American Literary Scholarship** ,1990 **History, Politics, Identity** Marija Knežević,Aleksandra Nikčević-Batričević,2008 The essays gathered here address a common core of questions arising from the global nature of problems concerning history ideology and identity **Publications of the Modern Language Association of America** ,2005 [Aethlon](#) ,2005 The journal of sport literature [Audio Book](#) Mikko Keskinen,2008-04-11 Audio Book deals with the ways in which various technologies enabling the transmission or storing of sound and voice are figured in selected works drawn from contemporary narrative fiction The sound technologies are shown to influence the narrative structure metaphors and **Meaningful Forms** Mitchum A.

Huels,2004     *The Rocky Mountain Review* ,2008     *Subjects of Substance* Julian Henneberg,2020 Recent U S literature has both been informed by and critically engaged with materialist conceptions of selfhood Over the past decades disciplines like neuroscience and evolutionary biology have increasingly recast the human self as a malleable construct produced by physiological processes In a parallel development literary authors have created their own conceptions of somatic subjectivity in conjunction or contrast with scientific and medical discourses *Subjects of Substance* examines the forms functions and effects of materialist models of mind in selected memoirs and novels Authors discussed include Michael W Clune Don DeLillo Kay Redfield Jamison Siri Hustvedt Richard Powers Elyn R Saks and David Foster Wallace
