Dont Kill It Its Me:

Dead Central Rose Garnett,2017-09-25 Rose is a mind reading mercenary hired to track down and kill the perpetrators of unsolved murders in and around Edinburgh Vampires and werewolves stalk the city s pubs and clubs taking victims and getting away with it After all they can eat the evidence The city s only protection is Rose with her ability to communicate with the dead and the city s other supernatural predators She s the last resort for the desperate but the work is making her more of a threat to the city than the monsters she hunts This time she s battling a shadowy organization named Carnalis and the ancient evil it has awakened a vast power bent on destroying the city that gave it birth Rose and her supernatural allies are the last line of defense and time is running out *Memoirs of the American Folk-lore Society* ,1927

Narrating Nature Mara Jill Goldman,2020-11-03 The current environmental crises demand that we revisit dominant approaches for understanding nature society relations Narrating Nature brings together various ways of knowing nature from differently situated Maasai and conservation practitioners and scientists into lively debate It speaks to the growing movement within the academy and beyond on decolonizing knowledge about and relationships with nature and debates within the social sciences on how to work across epistemologies and ontologies It also speaks to a growing need within conservation studies to find ways to manage nature with people This book employs different storytelling practices including a traditional Maasai oral meeting the enkiguena to decenter conventional scientific ways of communicating about knowing and managing nature Author Mara J Goldman draws on more than two decades of deep ethnographic and ecological engagements in the semi arid rangelands of East Africa in landscapes inhabited by pastoral and agropastoral Maasai people and heavily utilized by wildlife These iconic landscapes have continuously been subjected to boundary drawing practices by outsiders separating out places for people villages from places for nature protected areas Narrating Nature follows the resulting boundary crossings that regularly occur of people wildlife and knowledge to expose them not as transgressions but as opportunities to complicate the categories themselves and create ontological openings for knowing and being with nature otherwise Narrating Nature opens up dialogue that counters traditional conservation narratives by providing space for local Maasai inhabitants to share their ways of knowing and being with nature It moves beyond standard community conservation narratives that see local people as beneficiaries or contributors to conservation to demonstrate how they are essential knowledgeable members of the conservation landscape itself
