Colonies In Space:

Colonies in Space T. A. Heppenheimer, 2017-09-15 Is there life in space Within the solar system which we can reach and are now beginning to explore the answer may be Nothing but spores and bacteria Perhaps the answer is Nothing Beyond our region of space the answer may yet be Civilizations and cultures of greatness and magnificence untold But we have not yet learned to detect them or to communicate with them As this has become apparent there has been a reaction against many of the more utopian hopes associated with space flight Less than fifteen years ago John Kennedy could commit the nation to explore this new ocean with widespread hope that we were entering a new Age of Discovery Today it is fashionable to believe that our problems can find solution only on earth and there is nothing in space which can aid us in any way This is not so If we cannot find planets fit for us to live on or if Mars is not up to our fondest hopes very well We can take our own life into space We can build colonies in space as pleasant as we want and productive enough to markedly improve humanity's future prospects And we can begin to do this anytime we please *The High Frontier* Gerard K.
