## Color Treasury Of Gems Jewels:

**Color Treasury of Gems and Jewels**, 1967 *Color treasury of gems and jewels*, 1971 **The Color Treasury of Gemstones** Michael Wolgensinger, 1975 **The Color Treasury of Gemstones** Eduard Gubelin, 1969 **The Color Treasury of Gemstones (patron never returned book)**. Eduard Gubelin (Dr), [Dictionary of Gems and Gemology](#) Mohsen Manutchehr-Danai, 2013-03-09 Since World War II the amount of information generated in the science of Gemology has increased tremendously Therefore this book Dictionary of Gems and Gemology was written with the aim of providing a relatively complete dictionary to assist all students hobbyists scientists and interested parties in the fields of Gems and Gemology The forerunner to this book was called Dictionary of Gems and Gemology English Persian Persian English published in Tehran Iran in 1997 It was written with the aid of more than thirty refer ence books relating to gemology In response to the effort required to clarify the terms within I decided to compile a book that brings all the relevant terms into one book This new book eliminates the use of different reference books and compiles nearly all the relevant terms into a one stop useful text It took twenty five years to collect the terms and the information so as to present a complete and functional lexicon The text is supported by nearly 170 illustrations and 21 tables to provide detailed and succinct information I hope and trust that this book will reach the high standard of other gemological dictionaries If you have criticisms or suggestions please feel free to contact me Professor Dr Mohsen Manutchehr Danai Los Angeles Tehran Regensburg Acknowledgments The author acknowledges all those who were of valuable assistance during the writ ing and publishing of this book *Faceting History: Cutting Diamonds and Colored Stones* Glenn Klein, 2005 The author of Faceting History Cutting Diamonds and Colored Stones has for a long time had a deep interest in learning how the early faceters cutters of diamonds and colored gemstones were able to complete their work What methods did they use What equipment did they have to make success possible How soon did they discover how to complete the many phases necessary to accomplish their work How did the equipment and methods differ between fashioning diamonds and faceting colored stones These are just a few of the questions that the author wanted to find the answers for In looking for answers to these and other questions the author found that there were bits and pieces of information available in many previous books but there was not a good book available that would answer most of his questions Upon hearing the author s remarks about this fact one of the librarians at the wonderful library located at the Gemological Institute of America s Carlsbad campus said that if such a book was not available maybe you should write the book Well the author had been thinking of doing just that but the remark caused the author to see the light and agree to get started on the project Little did he know then that the project would require many months of eight hour days over seven day weeks to get the book completed He decided to write a book that would answer these and other related questions that he had The thought also occurred to him that such a book would be a valuable volume to be placed in libraries of individual faceters around the world He realized that such a book would also be of great value to anyone who

works behind a Jewelry store counter A successful sales person is one who is knowledgeable about the products that they are selling A book of faceting information would be extremely valuable if read and re read from time to time A customer in the Jewelry store will no doubt be favorably impressed by a sales presentation that is made with the use of interesting and informative information about diamonds and the various colored gemstones The customer will be convinced that the sales person knows about what they are talking The author has spent nearly three years on the project of researching the GIA library and other libraries along with the extensive personal library of gemstone related books that he personally possesses Many conflicting reports were noted in his study He has made the statements in his book reflect the most commonly accepted opinions of the most respected authors works that he has found in his research History is only obtainable from the earlier works of other authors We cannot go back to the long past centuries ourselves to see first hand what really happened and when it happened A study of faceting history requires making the best choices of the information that is available This completed book answers questions as to why the fashioning of diamonds was is so different from the faceting of colored gemstones The book compares the needed equipment and the methods that have brought the greatest successes In addition a great deal of other information connected to faceting is included There are seven chapters in the book and there are over 125 photographs of the early equipment and methods that were used The photographs show the faceters the workroom conditions and the tools and equipment that they used to complete beautiful and lasting gemstones The book chapters are titled An Introduction to Faceting Early Man s Stone Appreciation Diamond Fashioning Procedure and Equipment Colored Stone Faceting Procedure and Equipment The Evolution of Cut Designs Famous and Historic Gemstones Sources of Diamond and Colored Stone Rough and lastly Advances in Faceting Over the Past One Hundred Years Within each of these chapters the reader will find a multitude of additional and interesting information Chapter One Early Faceting Inform Modern Jeweler's Consumer Guide to Colored Gemstones David Federman, 2012-12-06 Since early 1989 a gem dealer I ve known for years has been calling me every few weeks to brief me on mounting mayhem in Colombia s lucrative emerald market The troubling gist of these calls is always this There is a full fledged turf war going on between that South American country s bustling drug and gem trades for control of its emerald export business According to this dealer and several others anywhere from two to four thousand emerald industry people mostly miners and dealers have been murdered since 1980 No doubt the gem sector itself never gun shy has retaliated in full and in kind After all the two groups have banded together in an intermittent alliance against a common enemy Communist guerillas with results the CIA would envy I mention this bloodshed because of something the gem dealer once said to me I bet you never think of what a gem has to go through to get to a jewelry store He s right I tend to think of colored stones as things of beauty not objects of gruesome power struggles between mining kingpins and drug lords Can you blame me or anyone with insider knowledge if a gem sheds any connection with its past once sculpted by a cutter into the glittering marvel we see in a jeweler s showcase Like Odysseus listening to

the sirens song we become victims of an aesthetics induced amnesia      *Gems & Gemology* ,2003      *State Geosymbols* Alan McPherson,2011 From the tourmaline of Maine to the black coral of Hawaii our state s official geological symbols or geosymbols are as uniquely diverse as the terrain and character of the 50 states themselves In this reference book over 150 state geosymbols are presented with informative text that highlights their adoptive legislation geologic and social history Color photo montages add visual interest to the pages      **The Ruby & Sapphire Buying Guide** ,1994 You don t have to be a jeweler or gemologist to tell a ruby from red glass or a good sapphire from a bad one The Ruby and Sapphire Buying Guide will show you how It s easy to read has lots of photos and gives clear step by step pointers on how to buy the best stone for the money This is the only book to offer detailed guidelines and pictures on judging ruby and sapphire quality Book jacket
