**Instinct Combat Shooting** Chuck Klein,2016-08-05 While much has been written about instinct shooting with long guns very little had been published on doing so with a handgun until this publication Written by a pioneering author of the concept Instinct Combat Shooting Defensive Handgunning for Police now in its fourth edition is not about winning target shooting competitions but purports surviving real life firefights by examining testimonies of shootout survivors and carefully analyzing firefights that prove shooting instinctively is not only crucially fast but also equally accurate The book defines instinctive combat shooting as The act of operating a handgun by focusing on the target as opposed to the sights and instinctively coordinating the hand and mind to cause the handgun to discharge at a time and point that ensures interception of the projectile with the target The concepts behind instinct combat shooting discussed in this book are now being integrated into some of the most progressive police academies in the United States and around the world New chapters provide valuable material dispelling myths on indexing laser sights and other trick shooting methods Intended to help officers survive close quarter combat conditions Instinct Combat Shooting is an essential tool for police looking to improve their close range shooting skills and enhance their firefight survival

*Advance Handgun Survival Tactics* David H. Leflet,Curtis L. Porter,2013-08-01 Target shooting is about placing your shots in the center of a small target T he penalty for not doing so is a poor score Tactical shooting is about stopping someone from shooting you T he penalty of not being able to do this is the loss of your own life J Henry FitzGerald Shooting 1930 In *Advanced Handgun Survival Tactics* authors Dave Leflet and Curtis Porter demonstrate why most of what is being taught today about tactical shooting is not just worthless but also dangerous To combat this they drew on their years of

tactical shooting experience in law enforcement and the military along with proven scientific and medical research to create their own training program for developing and maintaining tactical readiness for law enforcement officers and civilians interested in combat shooting Their tactical training system which they call the Porter method is a reality based approach to handgun shooting The tactical skills they teach are based on combat shooting techniques that have been repeatedly field tested and proven during actual combat by gunfighters combat veterans military instructors and law enforcement officers They are not based on police firearms training because most police training is badly flawed and unsafe for people who attempt to use it in the real world One common mistake people make is believing that shooters who can punch holes in paper targets have the skills they need to prevail in a real shoot out where the targets are shooting back They are dead wrong There are no second place winners in tactical shooting You have people who survive and people who die This book teaches shooting techniques that can help you survive Though it is primarily about handgun shooting the authors have included a bonus chapter on tactical shotgun shooting for special situations

#### **A Review of Combat Handgun Shooting** VJM.

DiMaio,1977 This is a well written beautifully illustrated book The author is obviously knowledgeable about and interested in his subject The intended audience for this book originally appears to have been individuals interested in the sport of combat handgun shooting In writing the book however the author has produced a textbook on combat handgunning which should be of interest to law enforcement agencies as well as individual police officers This book can assist such agencies in firearm training as well as in making decisions as to choice of suitable weapons and ammunition The book should be required reading for all firearms instructors if not for all police officers In short I highly recommend this book
