Beare,1989 *Colour Atlas of Paediatric Dermatology* J. Verbov, W.N. Morley,2012-12-06 We have felt for some years that an atlas of paediatric dermatology merited a place in the world dermatological literature Non dermatologists find skin conditions difficult to describe and diagnose and this may be even more difficult in children We usually rely on the parents for a history in children although many conditions can be self diagnosed In this atlas we have tried to illustrate conditions seen regularly in our clinics as well as some seen more rarely but which are nevertheless important to recognize We have limited the number of illustrations in order to produce a realistically priced book and thus it has not always been easy to decide what to include and what to omit However we hope that we have produced a reasonably comprehensive work We hope that this atlas will have a wide appeal both at home and abroad It is a book either to read or to browse through It is intended for senior medical students family practitioners and for trainees both in dermatology and in paediatrics We would like it to be taken to skin clinics to be available for instant perusal and to be on hand in the paediatric ward We have said comparatively little about treatment because this alters regularly and often varies in different centres and because we do not
