Rocky Mountain Divide

John B. Wright, 2010-07-22 The opposing forces of conservation and development have shaped and will continue to shape the natural environment and scenic beauty of the American West Perhaps nowhere are their opposite effects more visible than in the neighboring states of Colorado and Utah so alike in their spectacular mountain environments yet so different in their approaches to land conservation This study explores why Colorado has over twenty five land trusts while Utah has only one John Wright traces the success of voluntary land conservation in Colorado to the state s history as a region of secular commerce As environmental consciousness has grown in Colorado people there have embraced the businesslike approach of land trusts as simply a new more responsible way of conducting the real estate business In Utah by contrast Wright finds that Mormon millennialism and the belief that growth equals success have created a public climate opposed to the formation of land trusts As Wright puts it environmentalism seems to thrive in the Centennial state within the spiritual vacuum which is filled by Mormonism in Utah These findings remind conservationists of the power of underlying cultural values that affect their efforts to preserve private lands

Thompson,1990 **Annotated Bibliography of Colorado Vertebrate Zoology, 1776-1995** Richard G. Beidleman,Reba Rutz Beidleman,Linda H. Beidleman,2000 This compilation catalogues the writings on the diverse vertebrate species within Colorado s boundaries beginning with the Escalante Expedition which skirted the western slope a

century before Colorado's statehood. Because of its geographical location between East and West North and Southwest its altitudinal range of more than 11,000 feet and its consequent variety of ecosystems from desert shrub to alpine tundra, Colorado ranks high among the fifty states for its variety of vertebrates. With such an abundance of these vertebrates, biologists and observant laypersons have had much to write about. This comprehensive bibliography is divided into major sections: General Natural History, Fishes, Amphibians, Reptiles, Birds, and Mammals. Each taxonomic group has a general section followed by listings at taxon levels down to alphabetically arranged species. The bibliography is especially complete with respect to periodical literature through 1995. Colorado Vertebrate Zoology cites resources for studying both well researched vertebrates and those needing more study.
