Battletech a Time of War Catalyst Game Labs,2010-12 **Combat Equipment** Bills,Fanpro,2005 **Combat Engineering Equipment of the Warsaw Pact** Russell Phillips,2017-11-07 The ability to advance rapidly over sometimes difficult terrain was a key part of the Warsaw Pact s strategy The Eastern European nations which formed this historic alliance wanted to be able to move quickly and effectively so they didn t give their enemies an advantage The vital tools which helped the Warsaw Pact overcome the challenges it faced included a whole range of combat engineering equipment This book is a factual reference of the equipment which was used throughout the Cold War period and the important roles each piece played With obstacles including rivers and minefields to negotiate combat units could have faced costly delays if it hadn t been for the diligent work of the Warsaw Pact s engineers Refusing to allow troops to be slowed down by the landscape these combat engineers worked in sometimes challenging conditions to find safe routes to their destination From building bridges and clearing safe lanes through minefields to repairing and recovering broken down vehicles and creating field fortifications the work of these engineers played an essential part in the Warsaw Pact s military strategy But the work of this effective force would have been impossible without the specialist engineering equipment they used Rugged simplistic compared to their Western equivalents these items would play a crucial part in both peacetime military exercises and combat operations in Afghanistan *Equipment Combat Readiness Handbook* Canada. Canadian Armed Forces. Combat Arms School,1969 *The Battletech Manual* FASA Corporation,1987-09 *Jane's Personal Combat Equipment* Alexander Stilnell,2003-03-01 Contents include Army Navy Air Force clothing footwear headwear personal protection equipment survival equipment diving equipment load carrying equipment Miscellaneous equipment NATO army recognition guide Index of products by manufacturer *Jane's Personal Combat Equipment 2002-03* Alexander Stilnell,2002-07-01 Contents include Army Navy Air Force clothing footwear headwear personal protection equipment survival equipment diving equipment load carrying equipment Miscellaneous equipment NATO army recognition guide Index of products by manufacturer *BattleTech* FASA Corporation,1992-08 *Diagnosing the Army's Equipment Readiness: The Equipment Downtime Analyzer* ,2002 The new Army Vision with its emphasis on rapid force deployment followed by immediate employment demands logistics processes and robust equipment that enable soldiers to keep equipment ready to fight Forces will have to pick up and go in the readiness state they find themselves in at the time they receive a deployment order must arrive at the area of operation ready to fight and then must have the ability to sustain a high level of equipment readiness Achieving this

in turn calls for dramatic progress in optimizing the Army's ability to keep equipment ready. This requires optimizing the logistics system's equipment sustainment processes as well as enhancing the companion processes product development and recapitalization that produce equipment reliability. To do this the Army must have metrics that realistically portray how well its equipment readiness capabilities support the Army Vision. These metrics should connect the underlying logistics and equipment reliability processes to equipment readiness and illuminate their interactions. Without the ability to make these connections and to see how the component parts fit together to create the overall picture the Army could make some individual processes highly efficient yet still fall short of satisfying equipment readiness needs. **BattleTech** FASA Corporation Staff, 1986-09-01

Combat Engineer Equipment Support to the Air Assault Division Jeffrey A. Wagonhurst, ARMY WAR COLL CARLISLE BARRACKS PA., Army War College (U.S.), 1988 Engineers have the mission to provide combat support to the United States Army maneuver forces. These missions fall into the five categories of mobility counter-mobility survivability sustainment engineering and topography. In these areas the engineers in support must focus their assets on the needs of the maneuver commander. To maximize the effectiveness of the engineer force structure engineer units have historically been augmented with equipment to help accomplish their missions. In some cases engineer equipment scheduled to be placed in the Air Assault Engineer Battalion is too heavy. Future force structure documents authorize heavier equipment which is not needed. This study reviews the requirement for equipment the availability of equipment and some alternatives. It also suggests the direction the United States Army may wish to follow to procure lighter engineer equipment not only for the Air Assault Division but for Airborne and Light Infantry Divisions as well.
