## Combustibility Of Plastics:

*Combustibility of Plastics* F. Fire,1991 Although many people may want to know how plastics burn the question of how plastics burn is only a part of a much larger question How does anything burn To examine the burning process of plastics in isolation does not make any sense and may lend credence to the idea that plastics are a special material with a special hazard An analogy would be to study how carbonless carbon paper burns and then to relate the burning characteristics and combustion products of this single type of paper to all other types of paper and even to other wood products and to wood itself The testing of one type of product from a very large family of products that are physically similar and the relation of these test results to all other members of that family has no basis in the scientific method Those who do so are ignorant of science unless they have some hidden reason for wanting to ascribe certain properties to all related materials Plastics H. Macskásy,Gyula Palyi,2012-12-02 Presented here in detail is a number of generally accepted standardised inflammability tests A comprehensive survey of ISO IEC ASTM VL BS and DIN is given and other standards are also mentioned The testing of materials products and full scale model testing are described Furthermore the book describes methods for reducing the inflammability of plastics various techniques for fires involving plastics and fire regulations **NBS Technical Note** ,1970
