consciousness in living things He uses his own experiences those of contemporaries such as Tennyson and of historical figures such as Francis Bacon as evidence for moments of higher consciousness and intellect known as cosmic consciousness Bucke's theory is of three states of progressive consciousness attained through evolution The Simple Consciousness of animals Self Consciousness of man to understand his place in the universe and Cosmic Consciousness where man might grow to understand the life and order of the cosmos This pinnacle of understanding is a progression assisted by evolution that Bucke hopes will one day come to all men A thought provoking book at any time full of optimism for the intellectual future of the human race

Cosmoconsciousness or cosmic consciousness is a term used to characterize a transcendence of the limits of self consciousness As an ultra state of illumination of the mind the roots of the conception are embodied in the quest for a spiritual connection with multi dimensional cosmos This quest searches for spiritual development as a pathway to human excellence and can be associated with the mystics of ancient wisdom as well as contemporary psycho spiritual analysts After its emergence in the late 19th century cosmic consciousness rapidly became a source of inspiration for transpersonal psychology moral therapy and a thoughtful link to mystical quantum physics By encouraging a spiritual way of perceiving the real world cosmic consciousness also provides a source of inspiration for human excellence as the central idea of global ethics In this perspective the world cannot be changed for the better without changing individual consciousness Global concerns including ecological issues violence and acts of terrorism materialistic gratification and hedonism could not be addressed effectively unless people's consciousness is changed Cosmic consciousness by the very perception of the inner life has the potential to struggle with global concerns and hence it holds a promise of human excellence This book discusses cosmic consciousness against the backdrop of the emergence of the rational and autonomous conception of the self and the modern psychological depiction of selfhood It places the idea of cosmic consciousness at the centre of contemporary arguments on the nature of consciousness

**Cosmic Consciousness** Richard Maurice Bucke, 2025-02-17 Richard Maurice

Bucke's Cosmic Consciousness is a profound exploration into the nature of human consciousness and its potential for evolution. Bucke's work is not just a dry academic treatise; it's a passionate personal quest to understand a higher state of awareness that he believes is the next step in human development. The book is dedicated to his son Maurice who died tragically, and the inscription reflects the author's deep grief and his hope for a life beyond the physical realm. This personal context frames the entire work, giving it an emotional depth and urgency.

**Cosmic Consciousness: An Introduction** Dr. Richard Maurice Bucke, 2008-09-29

There is an ages-old unexplained mystery of genius and enlightenment. Many people talk of seeing the light as a temporary intense affair where all the world's knowledge and understanding is unveiled to an individual in a brief moment outside of time. He carefully researched and compiled all the illuminated individuals he could find. As a trained M.D. and psychiatrist working in a mental institution, he was in a unique position. Bucke provides three dozen very consistent examples of cosmic consciousness. Some of these were contemporary case histories which he collected. Bucke proposed that these enlightened figures are evolutionary jumps, the predecessor of a more advanced species. Jesus, Buddha, Mohammed, Dante, William Blake, Shakespeare, and others were included. His tender lessons will lead you to a new dimension of awareness: cosmic consciousness. The author also shares teachings on the Divine Mother, the presence of love, the eternity of being, and the aura as an expanding egg of cosmic consciousness. Includes a guided meditation for nourishing the heart and the soul.

**Cosmic Consciousness** M. D. Richard Maurice Bucke, 2011-03

Cosmic Consciousness: A Study in the Evolution of the Human Mind is Richard Bucke's theory that our mental states are evolving and that to date we have experienced three stages in the development of consciousness: the simple consciousness of animals, the self-consciousness of the vast majority of humans, reason, self-awareness, imagination, etc., and in some cases, cosmic consciousness, a mystical state of being beyond self-consciousness and the next stage of human development. Bucke hypothesized that cosmic consciousness is slowly beginning to appear in humans and will eventually spread widely throughout the human race. He posited that certain notable individuals throughout history have demonstrated that they have attained cosmic consciousness. In the book, he cites examples such as Jesus, Buddha, Mohammed, Dante, St. Paul, Francis Bacon, William Blake, and his close friend Walt Whitman. Whitman, an American poet and journalist, described cosmic consciousness as ineffable light, light rare, untellable light beyond all signs, descriptions, and languages. At the age of thirty-five, Bucke found himself in this elevated mental state, and he describes in the third person the manifestations leading up to it:

1. The person suddenly, without warning, has a sense of being immersed in a flame or rose-colored cloud, or perhaps rather a sense that the mind is itself filled with such a cloud of haze.
2. At the same instant, he is as it were bathed in an emotion of joy, assurance, triumph, salvation.
3. Simultaneously or instantly following the

above sense and emotional experiences there comes to the person an intellectual illumination quite impossible to describe Like a flash there is presented to his consciousness a clear conception a vision in outline of the meaning and drift of the universe He does not come to believe merely but he sees and knows that the cosmos which to the self conscious mind seems made up of dead matter is in fact far otherwise is in very truth a living presence He sees that instead of men being as it were patches of life scattered through an infinite sea of non living substance they are in reality specks of relative death in an infinite ocean of life He sees that the life which is in man is eternal as all life is eternal that the soul of man is as immortal as God is that the universe is so built and ordered that without any peradventure all things work together for the good of each and all that the foundation principle of the world is what we call love and that the happiness of every individual is in the long run absolutely certain He goes on to say The person who passes through this experience will learn in the few minutes or even moments of its continuance more than in months or years of study and he will learn much that no study ever taught or can teach After reading Bucke s writings P D Ouspensky the respected Russian Philosopher echoed his comments in his book Tertium Organum Cosmic Consciousness is a third form which is as far above Self Consciousness as is that above Simple Consciousness The prime characteristic Cosmic Consciousness is as its name implies a consciousness of the cosmos that is of the life and order of the universe Along with the consciousness of the cosmos there occurs an intellectual enlightenment or illumination which alone would place the individual on a new plane of existence would make him almost a member of a new species

**Cosmic Consciousness: A Study in the Evolution of the Human Mind (Hardcover)** Richard Maurice Bucke, 2018-07-24 Richard M Burke's astonishing treatise on the human mind discusses and attempts to explain mystical experiences in the context of evolutionary change in the brain. During his mid thirties Burke underwent a feeling of revelation and felt distinctly enlightened for a short time. Although the period of enlightenment passed it had an immense impact upon Burke's outlook steering his personal and professional life in a directions he had never before envisioned. He found the experience a permanent boon to his well being and was able to work and enjoy life more than he formerly had. This book attempts to explain the various mystical feelings of enlightenment which humans have experienced over the millennia of recorded history. Burke's opinion is that these phenomena are becoming commoner over time and represent an evolution of the human mind. He postulates that these experiences will become commoner as centuries go by and become accepted as an ordinary then eventually as a necessary part of human life.
