Tax Court, 2014 *Environmental Impact II* G. Passerini, C.A. Brebbia, 2014-05-14 This book contains papers presented at the 2nd International Conference on Environmental and Economic Impacts on Sustainable Development incorporating Environmental Economics Toxicology and Brownfields Following the success of the first meeting held in the New Forest home of the Wessex Institute of Technology in 2012 it considers the pressing issues related to environmental impacts in order to provide complete solutions The included papers discuss how to assess the impact of economic constraints on the environment considering the social aspects as well as

any resulting environmental damage The overuse of natural resources and the resulting pollution of the environment need to be better understood in financial terms Uncontrolled development can result in damage to the environment in terms of the release of toxic substances and hazardous waste The increasing number of new chemical compounds poses a major challenge to the environment as it is difficult in many cases to predict their effects and take appropriate decisions Their economic impact can be particularly challenging The book examines issues related to whether some forms of development are compatible with environmental protection particularly in cases of possible serious contamination and toxicity The demand for development land has led to the reuse of properties that have been abandoned for a variety of reasons Many of them are brownfields sites which have deteriorated in different ways including by contamination These sites are usually a burden in terms of economic losses and contribute to the detriment of the quality of life of entire neighbourhoods Rehabilitation of local fields particularly those that are contaminated can be an expensive undertaking and require not only technical solutions but the involvement of financial regulatory and community stakeholders Fundamental to this premise is the analysis of the risks involved and the development of appropriate strategies The papers address problems of great importance discussing more constructive and progressive approaches to ensure sustainability A major motivation for the meeting is to learn from past failures to avoid repeating similar mistakes while attempting to prevent emerging threats to the environmental and ecological systems Topics covered include Environmental policies and planning Environmental assessments Development issues Sustainable cities Economic analysis Natural resources management Energy and the environment Food and the environment Ecosystems health Soil contamination Brownfields rehabilitation Water resources management Air and water pollution Toxicity studies Environmental health risk Risk analysis Community participation Legislation and regulations
