development of unmanned long range war rockets the other less often noted was the rocket powered research plane The first path led through the intercontinental ballistic missile to the first artificial satellites and space capsule the latter more uniquely American through the X series and Skyrocket rocket planes to the X 15 and ultimately to the Space Shuttle The early part of the book focuses on the Soviet American race to develop the ICBM in the 1950s and the first satellites with particular attention paid to the events and reactions that followed the flight of Sputnik I in 1957 and the subsequent missile gap era
