

DEFINING POLITICAL DEVELOPMENT

By: Stephen Chilton

CHAPTER 1:

FIVE FUNDAMENTAL THEORETICAL CHALLENGES IN CONCEPTUALIZING POLITICAL DEVELOPMENT

The central role of political development in the debates over Vietnam in the late 1960s led me to question the definition of development. It seemed that our society needed, but apparently had not been able to find, a normatively grounded, practically useful, analytic framework for the study and practice of political development. Applying the theoretical approaches of political development, political psychology, and political power analysis to the Vietnam war gradually led me to focus on certain abstract, theoretical problems as central to the debate over political development: fundamental conceptual challenges that, even if difficult to meet, were nevertheless guides to the heart of the issue.

The first of these problems was how to ground a theory of development normatively. U.S. justifications of its Vietnam policy explicitly relied on the normative claims of democracy. Opponents of the war denied those claims as false, as a blind, or as ethnocentric, but, even while opposing the war myself, I felt that reliance on normative arguments was at least apt. Public policy had to rely on some normative vision, the problem was to find solid moral ground.

The second problem was to assess the relative importance and interconnections of institutional and individual change in political development. This challenge was raised by the status of democracy in Vietnam. U.S. attempts to create the outward forms and rituals of democracy had not affected the "hearts and minds" of the Vietnamese people, and it became increasingly apparent that they simply practiced their political business as usual while preserving a democratic facade for foreign consumption. Cultural relativists of the time claimed that democracy was not relevant to the Vietnamese culture, but that seemed too easy an answer. Doctrinaire cultural relativism represents an abandonment of our common humanity, not to mention an abandonment of meaningful research into cultural variation, and I was reluctant to accept such an answer. In addition, democratic principles simply did not seem ethnocentric to me: a feeble reason when spoken by a Westerner, I suppose, but there it was. Finally, I had become aware, from Lucian Pye's (1966b) essay "Democracy and Political Development," that democracy required not just institutions and rituals but also particular citizen competencies. Pye also insisted that individual behavior, not just institutional form, was important. What I had encountered was, of course, the challenge of making the macro-macro connection: to create a theory of development in which individual change and institutional change appear as coordinate elements.
