Childhood Disability and Social Integration in the Middle Ages Jenni Kuuliala, 2016 This volume offers new insights into medieval disability studies by analysing miracle testimonies from canonization processes as sources for the study of medieval attitudes to and understanding of childhood physical impairments how they were defined and the social consequences of childhood disability on the family on the community and on children themselves In these texts laypeople from different social groups carefully described events leading to children s miraculous cures of physical impairments as well as the conditions themselves They thus provide an exceptionally rich yet hitherto unexplored window into the ways in which medieval society defined explained and understood children s impairments Besides simply describing disabilities and miraculous cures these testimonies also reveal various aspects of everyday experiences and communal attitudes towards impaired children The few testimonies by the children themselves offer fascinating insights into personal experiences of physical disability and how disability affected a child s socialization and the formation of identity This study thus aims to tease apart the often complex ways in which medieval society both viewed physical differences and how it chose to re construct these differences in the discourse of the miraculous as well as in everyday life

New Approaches to Disease, Disability and Medicine in Medieval Europe Erin Connelly, Stefanie Künzel, 2018-09-30 An interdisciplinary collection of papers focussing on infections chronic illness and the impact of infectious diseases on medieval society with contributions by academics from a variety of disciplines and a diverse range of international institutions

Disabled Clerics in the Late Middle Ages Ninon Dubourg, 2025-10-01 The petitions received and the letters sent by the Papal Chancery during the Late Middle Ages attest to the recognition of disability at the highest levels of the medieval Church These documents acknowledge the existence of physical and or mental impairments with the papacy issuing dispensations allowing some supplicants to adapt their clerical missions according to their abilities A disease impairment or old age could prevent both secular and regular clerics from fulfilling the duties of their divine office

Such conditions can thus be understood as forms of disability. In these cases the Papal Chancery bore the responsibility for determining if disabled people were suitable to serve as clerics with all the rights and duties of divine services. Whilst some petitioners were allowed to enter the clergy or in the case of currently serving churchmen to stay more or less active in their work others were compelled to resign their position and leave the clergy entirely. Petitions and papal letters lie at the intersection of authorized institutional policy and practical sources chronicling the lived experiences of disabled people in the Middle Ages. As such they constitute an excellent analytical laboratory in which to study medieval disability in its relation to the papacy as an institution alongside the impact of official ecclesiastical judgments on disabled lives.

Disability and Sanctity in the Middle Ages Stephanie Grace-Petinos, Leah Parker, Alicia Spencer-Hall, 2025-10-01 This volume significantly expands current understandings of both disability and sanctity in the Middle Ages. Across the collection heterogeneous constructions and experiences of disability and holiness are excavated. Analyses span the sixth to the fifteenth century with discussion of holy men and holy women. Western Christian and Buddhist traditions, hagiographic texts, images and artefacts. Each chapter underscores that disability and sanctity co-exist with a vast array of connotations, not just fully positive or fully negative but also every inflection in between. The collection is a powerful rebuttal to the notion of the integral relationship of disability, medieval and otherwise, with sin, stigma and shame. So doing it recentres medieval disability history as a lived history that merits exploration and celebration. In this way the volume serves to reclaim sanctity in disability histories as a means to affirm the possibility of radical disability futures.

Stumbling Blocks Before the Blind Edward Wheatley, 2022-10-20 Early attitudes toward blindness in France and England and the light those responses shed on contemporary attitudes toward disability.

Disease and Disability in Medieval and Early Modern Art and Literature Rinaldo Fernando Canalis, Massimo Ciavolella, 2021 Humanity has always shown a keen interest in the pathological, ranging from a morbid fascination with monsters and deformities to a genuine compassion for the ill and suffering. Medieval and early modern people were no exception, expressing their emotional response to disease in both literary works and to a somewhat lesser extent in the plastic arts. Consequently it becomes necessary to ask what motivated writers and artists to choose an illness or a disability and its physical and social consequences as subjects of aesthetic or intellectual expression. Were these works the result of an intrusion in their intent to faithfully reproduce nature or do they reflect an intentional contrast against the pre-modern portrayal of spiritual ideals and later through the influence of the classics the rediscovered importance and beauty of the human body. The essays contained in this volume address these questions, albeit not always directly but rather through an analysis of the societal reactions to the threats and challenges that essentially unopposed disease and physical impairment presented. They cover a wide range of responses, variable of course according to the period, under scrutiny its technological moment and the usually fruitless attempts at treatment.
