Disappearance Of J D Sinclair:

The Disappearance of J.D. Sinclair Keith A. Russell,1999

Relocating Consciousness Daphne M. Grace,2007-01-01

This book deals directly with issues of consciousness within works of postcolonial and diasporic writers It discusses fiction autobiography and theory to re formulate a writing of consciousness addressing contemporary cultural theory related to a wide range of dynamic writers and ground breaking novels A critical analysis of literature contextualises consciousness understood here as the source of language and human creativity and explores ways in which consciousness is involved in the creative process Tackling the controversial nature of consciousness itself the book argues that consciousness must be understood in its philosophical and social contexts The idea of relocating consciousness calls for a new aesthetics and ethics of living in the diasporic world where we are all to some extent migrant The book explores notions of consciousness as alternative narrative structures to society while expanding contemporary postcolonial theory beyond the limited dimension of power based on violence to a more visionary exploration of experience based on consciousness as unity in diversity Themes explored include sacred experience as empowerment trauma terror and the impact of consciousness cosmopolitanism and globalisation and the literature of human survival Written in a lively and accessible manner the book will appeal to all readers who enjoy being on the cutting edge of contemporary world literature

Medical and Social Aspects of Alcohol Abuse Boris

Tabakoff,2012-12-06 Alcohol use affects either directly or indirectly nearly all facets of Western civilization Eastern cultures are also not exempt from the influence of alcohol and the present decade has been a time of increased alcohol use in all parts of the world The problems of alcohol abuse and alcoholism are of concern to a variety of professionals in the biomedical and psychosocial health sciences and although the alcohol research literature contains much information on the relationships between alcohol ingestion and physiological neurochemical pharmacologic genetic environmental and psychological effects in humans and in subhuman species there is at the present time no advanced textbook that integrates the available information for use by both students and professionals The writing of *Medical and Social Aspects of Alcohol Abuse* constitutes an attempt to create a scholarly reference and resource for students researchers practicing clinicians and paraprofessionals who wish to understand the complex inter play of factors related to acute and chronic alcohol intoxication the effects of alcohol on body functions and treatment approaches to alcohol abusers and alcoholics

The Life and Behavior of Living Organisms Elliott Jaques,2001-12-30 Jaques presents a totally new general theoretical foundation for understanding the individual and social behavior of all living organisms In contrast to existing theories of behavior which are static Jaques has succeeded in breaking through to a truly dynamic orientation This breakthrough resulted from his fundamental research into work organizations that led to the realization that the difference between inanimate processes and all living behavior is that all living behavior is composed of intentional goal directed work This continuous work entails the

use of judgment in choosing goals and in making the decisions necessary to get to these goals This work process is the same in all living organisms including humans It is an ineffable process of the total organism inaccessible to direct observation and experience Intentionality is the dynamic of behavior This discovery has led over the past 50 years to extensive discoveries objective measures of work complexity and of the level of complexity capability of individuals in all species how human language differs from communication in other species the need to distinguish between horizontal evolutionary mutations within a given level of capability and vertical evolution to species with higher levels of complexity the nature of freedom within mutual trust inducing constraints Set forth to radically change the nature of all behavioral and social sciences in the new millenium Jaques analysis is essential reading for all scholars students and researchers as well as the general public involved with the behavior of living organisms Modeling of Indoor Air Quality and Exposure Niren Laxmichand
