Cosmos Creator :

Cosmos, Creator, and Human Destiny Dave Hunt, 2016-09 Why are we here And where are we going Does science have an answer to these two most fundamental questions of human existence Can mankind determine and direct the future of life on earth purely by scientific means Plagued by the failure of modern science to explain the most pressing questions of human existence many of today's postmoderns are once again boldly going where man has gone before in a desperate final quest for the hidden holy grail of cosmology Erwin Schrödinger the famed Austrian theoretical physicist who received the Nobel Prize in 1933 for his contributions to quantum mechanics confided Science knows nothing of good or bad God and eternity Whence came I and whither go I That is the great unfathomable question Science has no answer to it Echoing this dilemma British astrophysicist Sir Arthur Eddington famous for his work on the theory of relativity in the early 20th century also reasoned Thus in the physical world what a body does and what a body ought to do are equivalent but we are well aware of another domain where they are anything but equivalent There is a clear distinction between natural law which must be obeyed and moral law which ought to be obeyed Ought takes us outside of physics and chemistry Postmodern thinkers take pride in the perpetual pursuit of knowledge but the questions for readers now holding this book are clear How will you recognize the seemingly elusive chalice of ultimate truth when it actually appears And finally what will you do with it when this coveted cup is within your grasp In a sweeping panorama of inquiry and exploration the timeless quest within these pages leads grail seekers and skeptics alike to a destiny altering consideration of the cosmos and the question of human existence

The Marriage of Science and the Bible David Berg, 2020-05-04 The Marriage of Science and the Bible is an adventure in new concepts I invite you to explore them with me We will investigate God's scientific credentials We will witness his authority over physical science We will see how he is applying the logic of science to human history Our Creator introduced the scientific method Examining his predictions hypotheses we can judge their accuracy across 4 000 years of human history Evaluate use of science of history Begin with secrets of the universe revealed long before modern satellites Inspect a mathematically specific prediction of the coming of Jesus Christ Does the Creator speak in absolutes Does absolute truth exist Consider the complexity of predicting the themes of history and future events No man can do it Recognize the unparalleled importance of God's expansion of science Discover Jesus's description of biblical biology biblical physics and biblical chemistry in God's design for human life Consider why the availability of the Bible in the languages of Northern Europe resulted in the birth of modern science Follow the flaw in human philosophy to Darwin's theory Is it important that astrophysicists are linking the biblical account of creation with twentieth and twenty first century scientific discoveries Personally confirm the science of history by viewing God's hypotheses and current events in Israel Discover the purpose of human history It's an adventure in reality

Early Christian Theology J. Warren Smith,2026-01-20 An essential guide for understanding early Christian doctrine The history of Christian theology is often presented as a series of conflicts between orthodox believers and heretics But such an approach can be reductive especially if the conflicts are presented primarily as contests for power J Warren Smith s Early Christian Theology offers a more nuanced account of these theological disputes Smith explains the development of Christian theology in terms of diverse efforts to make sense of intellectual and spiritual complexities within Holy Scripture In Smith s telling Scripture is polyphonic as such it requires an interpretive framework that is flexible but also resistant to complete relativism According to Smith the early Christian creeds functioned as just such a framework Writing with an experienced teacher s gift for making history meaningful Smith traces the development of major theological themes and church dogma from the beginning of the second century to the Christological deliberations following the Council of Chalcedon in 451 While Smith focuses primarily on the second through the fifth centuries he also comments on theological

trajectories and controversies that grew out of the patristic period such as the filioque debate and the Monothelite controversy He examines key theological loci Trinity Christology soteriology anthropology ecclesiology and eschatology and their treatment in the patristic period by both major and minor voices Readers of this volume will come away with a deeper understanding of how and why key Christian doctrines developed within specific historic contexts A worthy successor to J N D Kelly s classic *Early Christian Doctrines* this monumental work is essential reading for divinity students and a valuable reference tool for scholars of historical theology
