Counseling Research And Program Evaluation:

Practical Approaches to Applied Research and Program Evaluation for Helping Professionals Casey A. Barrio Minton, A. Stephen Lenz, 2019-05-01 Practical Approaches to Applied Research and Program Evaluation for Helping Professionals is a comprehensive textbook that presents master's level counseling students with the skills and knowledge they need to successfully evaluate the effectiveness of mental health services and programs. Each chapter is aligned with 2016 Council for Accreditation of Counseling and Related Educational Programs (CACREP) standards. It guides counseling students through study design and evaluation fundamentals that will help them understand existing research and develop studies to best assess their own applied research questions. Readers will learn the basics of research concepts as applied to evaluative tasks, the art of matching evaluative methods to questions, specific considerations for practice-based evaluative tasks, and practical statistical options matched to practice-based tasks. Readers can also turn to the book's companion website to access worksheets for practitioner and student planning exercises, spreadsheets with formulas for basic data analysis, a sample database, PowerPoint outlines, and discussion questions and activities aligned to each chapter. Trevor J. Buser, Sandy Gibson, 2023-06-16 Reimagining Research centers antiracist research practices and showcases real-world research in counseling practice. The book focuses on the research competencies that matter most to counselors, with each chapter co-authored by practicing counselors and counselor educators. Each chapter reflects diversity in authorship and opens with a potential for practice case study that illustrates a research-related challenge in the practice of counseling. Online resources including a focus group interview, sample transcripts of qualitative interviews, video demonstrations of statistical techniques, and other documents used in research processes present these potentials for practice in experiential ways. Chapters close with attention to resources that are readily available for counselors who want to implement these practices, such as evidence-based practice guidelines, open access journals, and open access statistical tools. *Program Evaluation in School Counseling* Michael S. Trevisan, John C. Carey, 2020 Program Evaluation in School Counseling is the first book on program evaluation that looks to

the field and literature of program evaluation and then relates methods procedures and practices back to the practice of school counseling Written by two accomplished authors who teamed up to build evaluation capacity among school and school based counselors internationally the book highlights their interdisciplinary work covering many years and several continents Based on the authors model for teaching program evaluation and their research on school counselor competence in program evaluation this concise clear and practical guide supports the continuing professional development of school counselors through training workshops and self study This book addresses the program evaluation knowledge skills and understandings that school based counselors are expected to use in line with the CACREP 2016 Standards The book is intended as a companion text for university courses in research methods and or in the organization and administration of counseling services It is also appropriate as a self study guide to help practicing school counselors develop expertise in evaluation
