Case Absorption And Wh Agreement:

Case Absorption and WH-Agreement A. Watanabe, 2012-12-06 This book is an extensively revised version of the core part of my 1993 MIT doctoral dissertation which seeks to provide a Minimalist theory of Case absorption and support it through empirical investigation The central idea pursued is that impoverishment of phrase structure is responsible for Case absorption and that the right theory of Case checking should derive this property Although the basic line of research on Case absorption and wh agreement remains the same this book incorporates a lot of new results A principled theory of Case checking and Case absorption has been worked out in Chapter 1 Treatment of participial constructions in Chapter 3 and wh agreement in Chapter 4 is far more systematic and comprehensive Chapter 2 is also streamlined together with refinements of the analysis of Romanian The product I hope is a more convincing defense of the strength of the Minimalist approach I would like to thank my thesis committee members Ken Hale Noam Chomsky and Howard Lasnik under whose guidance this project started

Case Absorption and Wh-Agreement A. Watanabe, 1996-09-30 The study of A movement is receiving a lot of attention in recent research under the stimulus of the Minimalist Program This book provides a principled account of case absorption that gives a precise characterization of the similarities between causative and passive for the first time It further shows that raising and ECM also involve case absorption demonstrating the central role that case absorption places in the theory of A movement Case Absorption and WH Agreement is also the first systematic attempt to put a tight constraint on WH agreement surveying a wide range of phenomena discussed in the literature to show that despite the superficial morpho syntactic multiplicity of its realization WH agreement is highly restricted because it arises through the interaction between case theory and A bar processes This book targets researchers who are interested in the latest developments in the principles and parameters approach as well as those who want to understand central issues in the theory of A movement

Cleft Constructions in Japanese Syntax M. Kizu, 2005-01-07 Cleft constructions occur across languages and are much analyzed in

relation to syntax semantics and pragmatics Mika Kizu working in a Principles and Parameters framework with some consideration of the Minimalist Program provides the first coherent account of cleft constructions in Japanese She claims that the construction is analyzed on a par with topic constructions and some types of relative clause One of the most interesting properties the syntactic phenomenon of connectivity is closely examined Checking Theory and Grammatical Functions in Universal Grammar Hiroyuki Ura,2000-01-06 Ura demonstrates that his theory of multiple feature checking an extension of Chomsky's Agr less checking theory gives a natural explanation for a wide range of data drawn from a variety of languages in a very consistent way with a limited set of parameters *Deconstructing Ergativity* Maria Polinsky,2016 Nominative accusative and ergative are two common alignment types found across languages In the former type the subject of an intransitive verb and the subject of a transitive verb are expressed the same way and differently from the object of a transitive In ergative languages the subject of an intransitive and the object of a transitive appear in the same form the absolutive and the transitive subject has a special ergative form Ergative languages often follow very different patterns thus evading a uniform description and analysis A simple explanation for that has to do with the idea that ergative languages much as their nominative accusative counterparts do not form a uniform class In this book Maria Polinsky argues that ergative languages instantiate two main types the one where the ergative subject is a prepositional phrase PP ergatives and the one with a noun phrase ergative Each type is internally consistent and is characterized by a set of well defined properties The book begins with an analysis of syntactic ergativity which as Polinsky argues is a manifestation of the PP ergative type Polinsky discusses diagnostic properties that define PPs in general and then goes to show that a subset of ergative expressions fit the profile of PPs Several alternative analyses have been proposed to account for syntactic ergativity the book presents and outlines these analyses and offers further considerations in support of the PP ergativity approach The book then discusses the second type DP ergative languages and traces the diachronic connection between the two types The book includes two chapters illustrating paradigm PP ergative and DP ergative languages Tongan and Tsez The data used in these descriptions come from Polinsky's original fieldwork hence presenting new empirical facts from both languages **Islands and Chains** Cedric Boeckx,2003-07-17 The present work provides a detailed analysis of chain formation and locality conditions imposed on it within the Minimalist Program It does so by analyzing resumptive strategies in great detail This study claims that resumptive pronouns and their antecedents are first merged as constituents and are separated via movement thus forming instances of discontinuous constituents Resumptive chains are thus akin to the well known stranding analysis of quantifier float A taxonomy of islands is developed that crucially ties barriers for movement to agreement possibilities The stranding of a resumptive pronoun is shown to limit the role of agreement for the moving element thereby allowing a chain to be formed across an island **The Blackwell Companion to Syntax** Martin Everaert,Henk Van Riemsdijk,2008-04-15 Pre Order The Wiley Blackwell Companion to Syntax second edition publishing December 2017 Find

out more at www.companionstosyntax.com This long awaited reference work marks the culmination of numerous years of research and international collaboration by the world's leading syntacticians. There exists no other comparable collection of research that documents the development of syntax in this way. Under the editorial direction of Martin Everaert and Henk van Riemsdijk, this 5-volume set comprises 70 case studies commissioned specifically for this volume. The 80 contributors are drawn from an international group of prestigious linguists including Joe Emonds, Sandra Chung, Susan Rothstein, Adriana Belletti, Jim Huang, Howard Lasnik, and Marcel den Dikken, among many others. A unique collection of 70 newly commissioned case studies offering access to research completed over the last 40 years. Brings together the world's leading syntacticians to provide a large and diverse number of case studies in the field. Explores a comprehensive range of syntax topics from an historical perspective. Investigates empirical domains which have been well documented and which have played a prominent role in theoretical syntax at some stage in the development of generative grammar. Serves as a research tool for not only theoretical linguistics but also the various forms of applied linguistics. Contains an accessible alphabetical structure with an index integral to each volume featuring keywords and key figures. Each multi-volume set is also accompanied by a CD Rom of the entire Companion. Like the prestigious Blackwell Handbooks in Linguistics series, this multi-volume work in the new The Wiley Blackwell Companions to Linguistics series can be relied upon to deliver the quality and expertise with which Blackwell Publishing's linguistics list is associated.

This book provides a detailed study and a novel Minimalist account of copular sentences in Russian focusing on case marking alternations (nominative vs instrumental) and drawing a distinction between two types of copular sentences. On the assumption that Merge is defined in the simplest way possible, it is argued that not all syntactic structures are anti-symmetrical. One of the copular sentence types is analyzed as a poster child for symmetrical structures while the other type is treated as asymmetrical. The originality of this study lies in treating the copula in the two types of copular sentences neither as completely identical nor as two distinct lexical items; instead, the two types of copula are derived through the process of semantic bleaching. Furthermore, it is argued that the two types of the copula need to combine with post-copular phrases of different categories. It is concluded that Russian draws a distinction between saturated DPs and unsaturated NPs in spite of its renowned lack of overt articles.
