## **Case For Islamo Christian Civilization:**

**The Case for Islamo-Christian Civilization** Richard W. Bulliet, 2004-07-28 Conventional wisdom maintains that the differences between Islam and Christianity are irreconcilable. Pre eminent Middle East scholar Richard W Bulliet disagrees and in this fresh provocative book he looks beneath the rhetoric of hatred and misunderstanding to challenge prevailing and misleading views of Islamic history and a clash of civilizations. These sibling societies begin at the same time go through the same developmental stages and confront the same internal challenges. Yet as Christianity grows rich and powerful and less central to everyday life Islam finds success around the globe but falls behind in wealth and power. Modernization in the nineteenth century brings in secular forces that marginalize religion in political and public life. In the Christian world this simply furthers a process that had already begun. In the Middle East this gives rise to the tyrannical governments that continue to dominate. Bulliet argues that beginning in the 1950s American policymakers misread the Muslim world and instead of focusing on the growing discontent against the unpopular governments saw only a forum for liberal democratic reforms within those governments. By fostering slogans like clash of civilizations and what went wrong Americans to this day continue to misread the Muslim world and to miss the opportunity to focus on common ground for building lasting peace. This book offers a fresh perspective on U S Muslim relations and provides the intellectual groundwork upon which to help build a peaceful and democratic future in the Muslim world.

*Sociological Theory Beyond the Canon* Syed Farid Alatas, Vineeta Sinha, 2017-05-27 This book expands the sociological canon by introducing non Western and female voices and subjects the existing canon itself to critique. Including chapters on both the founding fathers of sociology and neglected thinkers it highlights the biases of Eurocentrism and androcentrism while also offering much needed correctives to them. The authors challenge a dominant account of the development of sociological theory which would have us believe that it was only Western European and later North American white males in the nineteenth and early twentieth century who thought in a creative and systematic manner about the origins and nature of the emerging modernity of their time. This integrated and contextualised account seeks to restructure the ways in which we theorise the emergence of the classical sociological canon. This book's global scope fills a significant lacuna and provides a unique teaching resource to students of classical sociological theory.

**Thomas Jefferson's Qur'an** Denise Spellberg, 2014-07-01 In this original and illuminating book Denise A Spellberg reveals a little known but crucial dimension of the story of American religious freedom a drama in which Islam played a surprising role. In 1765 eleven years before composing the Declaration of Independence Thomas Jefferson bought a Qur'an. This marked only the beginning of his lifelong interest in Islam and he would go on to acquire numerous books on Middle Eastern languages history and travel taking extensive notes on Islam as it relates to English common law. Jefferson sought to understand Islam notwithstanding his personal disdain for the faith a sentiment prevalent among his Protestant contemporaries in England and America. But unlike most of them by 1776 Jefferson could imagine Muslims as future citizens.

of his new country Based on groundbreaking research Spellberg compellingly recounts how a handful of the Founders Jefferson foremost among them drew upon Enlightenment ideas about the toleration of Muslims then deemed the ultimate outsiders in Western society to fashion out of what had been a purely speculative debate a practical foundation for governance in America In this way Muslims who were not even known to exist in the colonies became the imaginary outer limit for an unprecedented uniquely American religious pluralism that would also encompass the actual despised minorities of Jews and Catholics The rancorous public dispute concerning the inclusion of Muslims for which principle Jefferson s political foes would vilify him to the end of his life thus became decisive in the Founders ultimate judgment not to establish a Protestant nation as they might well have done As popular suspicions about Islam persist and the numbers of American Muslim citizenry grow into the millions Spellberg s revelatory understanding of this radical notion of the Founders is more urgent than ever Thomas Jefferson s Qur an is a timely look at the ideals that existed at our country s creation and their fundamental implications for our present and future

**Housing Capital** Simone Derix, Margareth Lanzinger, 2017-10-23 Throughout history houses have been an economic resource as much as a means of social political and cultural agency From the early modern period to the 20th century the multifaceted capital of houses linked individuals families and societies in specific ways The essays collected here probe the material texture of past societies concerning the inheritance value sale or maintenance of houses as well as the symbolic meanings that houses conveyed
