**Listening in the Afterlife of Data** David Cecchetto, 2021-12-27 In *Listening in the Afterlife of Data* David Cecchetto theorizes sound communication and data by analyzing them in the contexts of the practical workings of specific technologies situations and artworks In a time he calls the afterlife of data the cultural context in which data's hegemony persists even in the absence of any belief in its validity Cecchetto shows how data is repositioned as the latest in a long line of concepts that are at once constitutive of communication and suggestive of its limits Cecchetto points to the failures and excesses of communication by focusing on the power of listening whether through wearable technology internet based artwork or the ways in which computers process sound to pragmatically comprehend the representational excesses that data produces Writing at a cultural moment in which data has never been more ubiquitous or less convincing Cecchetto elucidates the paradoxes that are constitutive of computation and communication more broadly demonstrating that data is never quite what it seems
