Communication Case Studies for Health Care Professionals Paper Example Essay

Communication and Language Barriers case study

Communication is an essential factor for our daily lives (Meuter et al. 2016). In this case study, the patient was unable to communicate with the care provider due to the language barrier, gets the right services due to the introduction of a voice-on-phone translator (Pagano, 2015). Communication using a translator becomes easy, and the care provider finds it more accessible to give the right diagnosis to the patient (Pagano, 2015). The case study thus shows the importance of communication and overcoming language barrier when it comes to the provision of care to patients from diverse cultures and backgrounds (van Rosse et al. 2016).

Communication and Technology case study

In this case study, the importance of technology in communication is seen through the change in narrative between the patient and caregiver (Vaishnavi, & Kuechler, 2015). The patient can relate more to the caregiver once they explain how they are going to use technology to help in understanding the patient's condition and learn how they are improving from time to time (Pagano, 2015). It is also necessary to realize that patients feel more open with caregivers who are willing to provide them with solutions to their problems or instead of caregivers who are likely to give more hope to the patients.

Interpersonal and Gender Communication Style

In this case study, the first case the care provider talks to the patient with an intent to impose fear and blame on not having protected sex (Pagano, 2015). The patient feels scared which is not a good thing as it can result in irrational decisions. With enhanced interpersonal communication, the patient is assured that everything will be fine and advised on the way forward to avoid a similar complication (Hargie, 2016). The strategy helps calm the patient down and reduces their fear and creates confidence in using protection the next time when they are having sex (Gamble, T. & Gamble, M. 2014). The approach thus works appropriately for the patient, and it is likely to solve the problem from recurring once treated.
