**Music Therapy** Alfredo Zotti, 2020. Alfredo Zotti, a professional musician and bipolar survivor with a university degree in social anthropology and three years of study in psychology, provides an introduction to music theory with specific case studies of applications for Alzheimer's, bipolar disorder, autism spectrum disorder, ASD, schizophrenia, anxiety, depression, and other issues. Working primarily as a peer support counselor, his person-centered methods are respectful of clients' needs, abilities, and responses to music therapy. Strategies explored include both active listening of recorded music as well as instruction in playing musical instruments. Using patience and listening skills, you can with Zotti's book begin your own journey of music therapy. I congratulate Alfredo on this terrific summary of the ways in which music therapy can serve a complementary role in the treatment of a range of psychological difficulties. Anyone who is interested in promoting his or her wellbeing or the wellbeing of loved ones will enjoy *Music Therapy: An Introduction with Case Studies for Mental Illness Recovery*. Paul Corcoran, psychologist, Moving Forward NSW.

Alfredo Zotti's *Music Therapy: An Introduction with Case Studies for Mental Illness Recovery* shows that recovering through music can be an extremely powerful and wonderful journey of self-healing and positive discoveries. I highly recommend this book to anyone who wishes to enhance their knowledge of music therapy and the influence of music on their health and consequently on their lives.

Krystyna C. Laycraft, Ph.D., physicist, educator, and artist. Through his own experience of positive outcome by therapeutic use of music, Alfredo Zotti shares the supplemental holistic method to improving mental health issues and dementia. *Music Therapy: An Introduction with Case Studies for Mental Illness Recovery* promises to assist in the recovery process and help sufferers regain a happier life.

**Exploring the Journey of Music Therapy** Rekha Gupta, 2015. **Portraits of Everyday Practice in Music Therapy** Noah Potvin, Kate Myers-Coffman, 2023-05-12. *Portraits of Everyday Practice in Music Therapy* is an edited volume of case studies providing music therapy students and new professionals with critical reflections on everyday clinical practice across a variety of treatment settings, theories, approaches, and cultural contexts. These case studies articulate the important foundational work occurring around clinical breakthroughs to illustrate less of what music therapy could be given extraordinary circumstances and more of what music therapy frequently is given realistic circumstances. Additionally, each author explores the impacts of cultural values, expectations, and roles on clinical contexts through examinations of their

sociocultural identities and how they intersected with those with whom they worked Discussion prompts at the end of chapters help readers engage in similar reflective practices and sustain engagement with introduced concepts and ideas By providing ecological real world contexts for practice and culturally reflexive lenses through which to understand how therapeutic processes evolved music students and professionals can be better prepared for the authenticity and complexity of everyday clinical work
