Case Studies In Psychology:

Case Studies in Clinical Psychological Science William O'Donohue, Scott O. Lilienfeld, 2013-01-29 In the past few decades clinical science has emerged as a prominent model for training and practice in clinical psychology. This model emphasizes evidence derived from high quality research and is consistent with the increasingly influential evidence based movement in medicine which is a vital step toward making psychotherapy more effective, efficient and safe. Despite this trend much current psychological practice is not evidence based, moreover there is a marked dearth of resources available to train students and assist practitioners with the challenging goal of translating science into practice. *Case Studies in Clinical Psychological Science* demonstrates in detail how the clinical science model can be applied to actual cases. Edited by Professors William O Donohue and Scott O Lilienfeld, this book's unique structure presents dialogues between leading clinical researchers regarding the treatment of a wide variety of psychological problems from depression and Alzheimer's disease to Panic Disorder and chronic pain. Chapters describe what evidence based practice consists of for various clinical problems and are followed by commentary sections in which other leading clinical researchers analyze the case at hand, pointing out additional assessment and treatment options and controversial issues. The chapter authors then reply to the commentary in response sections. By examining the application of scientifically based interventions to actual cases and modeling thoughtful and collegial discussion among prominent clinical researchers, *Case Studies in Clinical Psychological Science* will assist students, practitioners and clinical researchers with the crucial task of applying research evidence to psychotherapy and bridging the gap between science and practice.

Classic Case Studies in Psychology Geoff Rolls, 2019-12-06 The human mind is both extraordinary and compelling. From the leader who convinced his followers to kill themselves to the man who lost his memory, these famous accounts have provided invaluable insights for scholars and researchers and amazed the public at large. Brought to life by Rolls, each case is contextualized with more typical behaviour while the latest thinking in each subfield is also discussed. Revised and updated, this new edition features two new case studies including the Jim Twins by Thomas Bouchard, an amazing case of twins separated at birth and adopted by different parents, yet when reunited 30 years later shared so many behavioural characteristics. It also features a new issues and debates chapter. *Classic Case Studies in Psychology* is accessibly written and requires no prior knowledge of psychology, just an interest in the human condition. The book will amaze, sometimes disturb, but above all enlighten its readers. Geoff Rolls has taught psychology for over 26 years and is currently Head of Psychology at Peter Symonds College, Winchester, UK. He is the author of the popular *Women Can't Park, Men Can't Pack* (Chambers, 2009) which investigates gender stereotypes including driving, and also *Taking the Proverbial* (Chambers, 2007) which explores the psychological truth behind well known proverbs and sayings.
