

The background of the cover is an abstract composition of overlapping geometric shapes, primarily triangles and polygons, in a wide range of colors including purple, pink, red, orange, yellow, green, and blue. Thin white lines crisscross the entire background, creating a complex, web-like pattern. The overall effect is vibrant and textured.

Casebook For Abnormal Psychology:

Casebook in Abnormal Psychology Timothy A. Brown, David H. Barlow, 2016-07-27 Using cases from the authors files or from case files of other working clinicians CASEBOOK IN ABNORMAL PSYCHOLOGY portrays the rich and arresting nature of disorders manifested in real people Cases illustrate every major DSM 5 category followed by a therapy outcome section that tells the rest of the story of what happened to these clients Using an integrative approach the authors emphasize the multiple causes of disorders and incorporate developmental and cultural issues in each case Complex cases are presented without a diagnosis so students can come up with a diagnosis on their own This Fifth Edition has been fully updated to present the advances in scientific knowledge and revisions to the definitions of psychological disorders found in the latest edition of the Diagnostic and Statistical Manual of Mental Disorders DSM 5 Important Notice Media content referenced within the product description or the product text may not be available in the ebook version [Casebook in Abnormal Psychology](#) Timothy A. Brown, David H. Barlow, **Casebook of Abnormal Psychology** A. J. Wood, **Casebook of Abnormal Psychology** Bitkers, 1990-09-01 **Abnormal Psychology Casebook** Andrew R. Getzfeld, 2004 Devoid of the often mind numbing technical psychobabble and medicalbabble so characteristic of other books on the subject this collection of abnormal psychology cases uses clear accessible language and explanations and a unique case conference format Each case begins with some background information and similar to Ellery Queen mysteries readers are challenged through questions at various points to try and decide what is going on based on the amount of information presented As each case gradually unfolds readers are drawn deeper into the case and must keep on reading to discover the case s assessment s evaluations diagnoses treatment plan s possible medications and prognoses The book features real cases based on a variety of psychopathologies all involving patients clients from a wide variety of cultural ethnic racial religious social and socioeconomic backgrounds and all based on the author s own experiences as a practicing social worker and psychologist Anxiety Disorders I Anxiety Disorders II Dissociative and Somatoform Disorders Mood Disorders Personality Disorders Substance Related Disorders Eating Disorders Sexual and Gender Identity Disorders Schizophrenia and Other Psychotic Disorders Developmental Disorders Developmental Disorders II You Be the Diagnostician Where Do We Go From Here For anyone interested in abnormal psychology including health care workers social workers educators etc **Casebook of Psychological Disorders** Steven Schwartzberg, 2000 This casebook offers fifteen lively cases that illustrate a wide range of specific DSM IV diagnoses covered in the abnormal psychology course These cases integrate issues of racial and gender diversity and provide insight into the lives of people suffering from a variety of psychological disorders highlighting how psychological distress is experienced and treated in real life Each case follows a similar pattern to aid reader comprehension

An Introduction describes the problems in the person's life or the catalyst bringing him or her into therapy. A Psychosocial History offers childhood and other relevant background data to provide a context for the disorder. The Conceptualization section offers the rationale for the diagnosis and the Treatment section then outlines the appropriate psychotherapy as well as any other treatments such as medication or group therapy. The Discussion section highlights interesting aspects of the case, presents relevant research, and examines various theoretical perspectives on treatment. Finally, the Prognosis section covers reasonable expectations of what the future might hold for this person. Critical Thinking Questions are posed at the end of each chapter. Gender and cultural diversity are highlighted among both clients and psychotherapists, with important cultural issues woven throughout the cases. The cases themselves feature people from a variety of backgrounds and heritages; the impact of sociocultural factors on the experience or prevalence of a disorder is often discussed, as well as how treatment is affected when the client and therapist come from different ethnic backgrounds. This casebook also features diverse theoretical orientations that drive treatment. Treatment outcomes are diverse and realistic and span from short to long term. Most are designed as ideal interventions, but some are influenced by economic concerns and changing models of available services. For anyone interested in abnormal psychology:
