Casebook Of Alternative Governance Structures And Organizational Forms:

A Casebook of Alternative Governance Structures and Organizational Forms Michael Hynes, Sheila Nataraj Kirby, Jennifer Sloan, Jennifer Sloan McCombs, 2000 This study examines alternative ways that government can carry out its activities It should prove useful to government agencies and decisionmakers who are considering options for organizing themselves or their functions in different ways

A Casebook of Alternative Governance Structures and Organizational Forms, 2000 Since the earliest days of the Continental Congress our government has sought alternative organizational and procedural constructs for important government supporting functions and instruments of policy that are inherently commercial in nature In this modern era the need for alternatives is even more pressing as the form and nature of government requirements become increasingly complex and budgets are constrained Some functions by their very definition cannot be performed other than in house These inherently governmental functions involve the discretionary use of governmental authority or in some way commit the government to a specific course of action or financial expenditure as stated in 48 CFR 7.5 If an activity is considered commercial or it can be restructured to partition the governmental and commercial functions competitive sourcing is usually selected to allow the in house group to participate in the competitive process Additional tests to determine whether an activity is commercial or governmental are in OMB Circular A 76 In this report we consider governance structures and organizational forms that offer alternatives to the usual in house provision of services These alternatives often offer a chance to adopt modern business practices streamline the organization and adopt market mechanisms to improve quality lower costs and become more responsive to constituencies The alternatives considered here have a wide variety of characteristics We found it useful to array them along the dimension of ownership of process and customer base These range from totally governmental to totally private or somewhere in between

Leading Organizations of the Future Olivier Serrat, 2023-12-27 This book delves into uncharted territory offering an extensive exploration of the future of organizations and how they should be led In a world characterized by volatility uncertainty complexity and ambiguity VUCA traditional organizational paradigms no longer suffice Instead this book introduces a visionary framework for the leadership of tomorrow's organizations one that adapts to the unique demands of each situation Drawing on insights from interviews with 12 subject matter experts this research driven work challenges the relevance of twentieth century leadership styles in the VUCA era The experts highlight the importance of metagovernance complexity leadership and sense making as essential components of navigating the ever evolving landscape of modern organizations Central to this exploration is the question of how to develop a context specific leadership management framework capable of guiding organizations through simple complicated complex and chaotic contexts This book not only identifies the pressing need for such a framework but also provides a comprehensive blueprint for its creation This book is a valuable resource for those who wish to understand the future of organizational leadership and

how it can adapt to the challenges and opportunities of the twenty first century It not only reshapes the current understanding of leadership but also offers practical insights that will shape the organizations of the future *The Practice of American Public Policymaking* Selden Biggs, Lelia B. Helms, 2014-12-18 Designed for upper level and professional courses this text is a state of the art introduction to the public policymaking process that gives equal attention to issues of policy implementation and public governance It uses an innovative systems approach integrating the activities actors tools and techniques of policymaking to provide a comprehensive framework for policy design and analysis The book is practice oriented with a focus on the ways that policymakers at all levels employ the standard technologies of governance authority agency program rule contract and budget to design policy outputs and achieve policy outcomes Through extensive use of graphics the text makes concepts easy to grasp for a generation of students accustomed to the visual presentation of ideas Case studies illustrate the tools and techniques discussed and key terms questions for discussion and suggested readings round out each chapter

Contractors on Deployed Military Operations Matthew Uttley, 2005 [Contractors on Deployed Military Operations: United Kingdom Policy and Doctrine](#), 2005 Since the Cold War the United States and United Kingdom UK armed services have undergone significant transformation in response to the radically altered threat environment new operational demands and reduced defense budgets Central to this transformation in both states is an expanded role for private contractors in providing deployed support functions traditionally conducted by uniformed personnel Despite the similar direction of military reform the U S armed services approach to battlefield outsourcing has undergone extensive public scrutiny and debate whereas UK Ministry of Defence MoD initiatives have hitherto attracted comparatively little independent assessment Close U S UK military cooperation over recent years in Afghanistan and Iraq and the likelihood that both states will remain close allies in future interventions suggest that the UK MoD s approach to deployed contractor support is a salient issue for U S military planners This monograph analyzes the MoD s outsourcing strategy and identifies those aspects of UK policy and doctrine that warrant consideration by the Department of Defense DoD and U S armed services Evaluation of the performance of MoD outsourcing policy and doctrine against measures of cost effectiveness and operational effectiveness reveals two broad observations The MoD has developed a number of novel command and control mechanisms that have succeeded in rationalizing and removing the risk in commercial battlefield support But the data necessary to evaluate the real impact of deployed outsourcing have yet to enter the public domain Similarly questions remain about the relative cost effectiveness of organic military provision and contractor alternatives Comparative analysis indicates that there are no fundamental differences in overarching MoD and DoD outsourcing philosophy but there are specific MoD initiatives that could enhance the U S armed services ability to manage their deployed contractor support 7
