Gary Saul Morson,Caryl Emerson,1990 Books about thinkers require a kind of unity that their thought may not possess This  
cautionary statement is especially applicable to Mikhail Bakhtin whose intellectual development displays a diversity of  
insights that cannot be easily integrated or accurately described in terms of a single overriding concern Indeed in a career  
spanning some sixty years he experienced both dramatic and gradual changes in his thinking returned to abandoned insights  
that he then developed in unexpected ways and worked through new ideas only loosely related to his earlier concerns Small  
wonder then that Bakhtin should have speculated on the relations among received notions of biography unity innovation and  
the creative process Unity with respect not only to individuals but also to art culture and the world generally is usually  
understood as conformity to an underlying structure or an overarching scheme Bakhtin believed that this idea of unity  
contradicts the possibility of true creativity For if everything conforms to a preexisting pattern then genuine development is  
reduced to mere discovery to a mere uncovering of something that in a strong sense is already there And yet Bakhtin  
accepted that some concept of unity was essential Without it the world ceases to make sense and creativity again disappears  
this time replaced by the purely aleatory There would again be no possibility of anything meaningfully new The grim truth of  
these two extremes was expressed well by Borges an inescapable labyrinth could consist of an infinite number of turns or of  
no turns at all Bakhtin attempted to rethink the concept of unity in order to allow for the possibility of genuine creativity The  
goal in his words was a nonmonologic unity in which real change or surprisingness is an essential component of the creative  
process As it happens such change was characteristic of Bakhtin s own thought which seems to have developed by  
continually diverging from his initial intentions Although it would not necessarily follow that the development of Bakhtin s  
thought corresponded to his ideas about unity and creativity we believe that in this case his ideas on nonmonologic unity are  
useful in understanding his own thought as well as that of other thinkers whose careers are comparably varied and
