Protectors of the Land and Water Thomas R. Huffman, 2000-11-09 Since the beginning of the twentieth century Wisconsin citizens have promoted innovative environmental programs During the 1960s Wisconsin was again at the forefront of the movement advancing mainstream political environmentalism Thomas Huffman traces the rise of environmentalism in the Badger State during these key years when the people of Wisconsin instituted policies in such areas as outdoor recreation and resource planning water pollution control the preservation of wild rivers and centralized environmental management Huffman focuses especially on the influence of Senator Gaylord Nelson a Democrat and founder of Earth Day and Governor Warren Knowles a Republican He shows that their efforts and the efforts of their followers in citizen groups the business and university communities and the state government clearly indicate that the origins of environmentalism cannot be placed along a left right political spectrum Rather the movement evolved from an interweaving of liberal and conservative ideologies and from important traditions and precedents within the state's environmental culture What happened in Wisconsin is particularly significant Huffman points out because of the effect of that state's example on other states and the federal government Originally published in 1994 A UNC Press Enduring Edition UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print These editions are published unaltered from the original and are presented in affordable paperback formats bringing readers both historical and cultural value
