

# Austin's Concept of Sovereignty

- The legal view, also called the monistic view or traditional view of sovereignty, was propounded by John Austin (1779-1859), a great jurist, in his book, *Lectures on Jurisprudence* (1832).
- According to Austin,
- "If a determinate human superior, not in the habit of obedience to a like superior, receives habitual obedience from the bulk of a given society, that determinate superior is sovereign in that society; and the society (including the superior) is a society, political and independent".

## **Austin And State Sovereignty:**

Concepts of State, Sovereignty and International Law Johannes Mattern, 1928      **State Sovereignty and International Criminal Law: Versailles to Rome** Jackson Maogoto, 2021-12-28 This innovative text shows how there has been a concerted effort since the end of World War I to curb a state's power and freedom of action through the concept of international accountability to a set of recognized rules and norms. A state not only is to adhere to these rules but also can be sanctioned by an international penal process through enforcement of international criminal law. Adoption of the Rome Statute and the creation of the International Criminal Court are the culmination of many years of effort to challenge the power of state action. Scholars and students of international law with an interest in international criminal law will find this volume an interesting narrative of how the developments of international penal mechanisms of the 20th century have contributed to a diminution of state sovereignty. Published under the Transnational Publishers imprint      **State Sovereignty and Non-Interference in International Law** Benjamin Mekinde Tonga, 2021-02-17 Master's Thesis from the year 2018 in the subject Politics Topic Public International Law and Human Rights grade 3 6 4 course Law language English abstract The principles of state sovereignty and non-interference rest at the very heart of International law and springs from the 1648 Westphalian treaty. Westphalian sovereignty is the principle of international law that each nation state has sovereignty over its territory and domestic affairs to the exclusion of all external powers. This is founded on the principle of non-interference in another country's domestic affairs and that each state irrespective of its size is equal in International law. This study shall rely principally on the doctrinal research methodology by systematic and thematic analysis of existing data on sovereignty and non-interference. The interpretation of sovereignty as narrowly as the non-intervention principle has placed sovereignty against the possibility of intervening for the protection of Human rights. The Rwanda genocide mass atrocity crimes and crimes against humanity that characterized the state of Rwanda and Srebrenica amongst others raised the need for action by the International community to protect not only states but also people. This thesis attempts therefore to find a bridge between these two seemingly opposing interests protecting the state for a strong international order and protecting the people to save lives. Responsibility to protect is based on the notion of a primary responsibility with each and every state to protect its population and a secondary responsibility with the international community to assist a state which is unwilling or unable to protect its people. This thesis concludes that responsibility to protect is part of sovereignty as a duty of a state corresponding to the right of non-intervention. If the reign fails to protect its people or is itself abusing its people the right of non-intervention becomes void      **Negotiating State and Non-State Law** Michael A. Helfand, 2015-07-02 Non-state law is playing an increasing role in both public and private ordering. Numerous organizations have emerged alongside the nation state each purporting to provide their members with rules and norms to govern their conduct and organize their affairs. The nation state increasingly finds itself sandwiched between two broad and contrasting categories of non-state law. The first law

above the state captures legal systems that function across the territorial borders of nation states The second category law below the state includes forms of local customary religious and indigenous law As these forms of non state law persist and proliferate alongside the nation state the relationship between state and non state law becomes more complex multifaceted and tense This volume addresses this relationship considering whether and to what extent state and non state law can coexist and how each form of law seeks to influence as well as transform the other
