Modernity Cathy Banwell,Dorothy Broom,Anna Davies,Jane Dixon,2012-12-30 Over a half of adults in the US Canada
Australia and numerous European countries are now overweight or obese a proportion that has risen sharply in the past two
decades Dominant biomedical explanations focus on the energy equation an imbalance between energy intake and
expenditure and remedies focus on motivating individuals to restore the balance by eating better and being more active or in
extreme cases surgical intervention This book offers a perspective that sees increasing obesity as a social phenomenon as
well as a public health problem It contains detailed accounts of three generations of Australians experiences of changing
environments and the emergence of social trends such as increasing availability of convenience foods the individualisation
and commercialisation of leisure car reliance and busyness Participants narratives are interwoven with sociological and
historical analyses of changes to show how contemporary Australians are experiencing and adapting to dramatic socio
cultural and environmental changes that are reshaping their lives and in many cases their bodies The book demonstrates that
obesity is an unintended consequence of economic development accompanied by profound socio cultural changes and by
identifying the key developments the authors propose leverage points While the research was conducted in Australia the
