**Perimetry Update 2002/2003** David B. Henson, Michael Wall, 2004 Perimetry Update 2002-03 contains a selection of papers presented at the 15th Visual Field Symposium of the International Perimetric Society (IPS) meeting held in Stratford upon Avon, England from 26-30th June 2002. The meeting titled Perimetry and Imaging in Shakespeare's Country was hosted by Professor John Wild of Cardiff University. Fourth International Visual Field Symposium Bristol, April 13-16, 1980 E.L. Greve, G. Verriest, 2012-12-06 The 4th International Visual Field Symposium of the International Perimetric Society was held on the 13-16 April 1980 in Bristol, England at the occasion of the 6th Congress of the European Society of Ophthalmology. The main themes of the symposium were comparison of classical perimetry with visual evoked response, comparison of classical perimetry with special psychophysical methods and optic nerve pathology. Understandably many papers dealt with computer assisted perimetry. This rapidly developing subgroup of perimetry may radically change the future of our method of examination. New instruments were introduced, new and exciting software was proposed and the results of comparative investigations reported. There have been many confusing statements in the literature on the relative value of perimetry and the registration of visual evoked responses. Several reports attempted to bring some clarity in this issue. There is reason for further comparative research. A number of papers dealt with special psychophysical methods, i.e. methods not using the simply monocular differential threshold. The old critical fusion frequency received new attention. Fundusperimetry was used for testing spatial summation. Acuity perimetry, binocular perimetry, etc. showed that there exist many possibilities for examining visual function. At present it is not clear to us what exactly the place of these methods is in our diagnostic armament. However

it is quite clear that some of them are promising and may lead to a further differentiation of perimetric methods
