Using Blogs to Enhance Literacy Diane Penrod,2007 Adolescents spend nearly six hours a day online with most of those hours focused on blogging Whether they are writing on MySpace Xanga Bebo LiveJournal or some other site these youngsters invest time and energy creating new or different social identities Beyond the mainstream media hype about the dangers of adolescents and blogs we find that

these young people are developing 21st century literacies especially in information and visual literacy Using Blogs to Enhance Literacy examines this phenomenon and how it affects adolescents from offering easy avenues for bullying to bridging the digital divide In this book Diane Penrod addresses the social developmental and pedagogical issues surrounding the use of blogs and the implications that blogging has for current and future students Managing the Drug Discovery Process Susan Miller,Walter Moos,Barbara Munk,Stephen Munk,Charles Hart,David Spellmeyer,2023-03-09 Managing the Drug Discovery Process Second Edition thoroughly examines the current state of pharmaceutical research and development by providing experienced perspectives on biomedical research drug hunting and innovation including the requisite educational paths that enable students to chart a career path in this field The book also considers the interplay of stakeholders consumers and drug firms with respect to a myriad of factors Since drug research can be a high risk high payoff industry it is important to students and researchers to understand how to effectively and strategically manage both their careers and the drug discovery process This new edition takes a closer look at the challenges and opportunities for new medicines and examines not only the current research milieu that will deliver novel therapies but also how the latest discoveries can be deployed to ensure a robust healthcare and pharmacoeconomic future All chapters have been revised and expanded with new discussions on remarkable advances including CRISPR and the latest gene therapies RNA based technologies being deployed as vaccines as well as therapeutics checkpoint inhibitors and CAR T approaches that cure cancer diagnostics and medical devices entrepreneurship and AI Written in an engaging manner and including memorable insights this book is aimed at anyone interested in helping to save countless more lives through science A valuable and compelling resource this is a must read for all students educators practitioners and researchers at large indeed anyone who touches this critical sphere of global impact in and around academia and the biotechnology pharmaceutical industry Considers drug discovery in multiple R D venues big pharma large biotech start up ventures academia and nonprofit research institutes with a clear description of the degrees and training that will prepare students well for a career in this arena Analyzes the organization of pharmaceutical R D taking into account human resources considerations like recruitment and configuration management of discovery and development processes and the coordination of internal research within and beyond the organization including outsourced work Presents a consistent well connected and logical dialogue that readers will find both comprehensive and approachable Addresses new areas such as CRISPR gene editing technologies and RNA based drugs and vaccines personalized medicine and ethical and moral issues AI machine learning and other in silico approaches as well as completely updating all chapters **Choosing Web 2.0 Tools for Learning and Teaching in a Digital World** Pam Berger,Sally Trexler,2010-04-09 Learning literacy and Web 2 0 Searching the Web Social bookmarking Managing and organizing information Content collaboration Media sharing Social networking Digital mapping **Web 2.0 technologies in education. A brief study** Serafeim A. Triantafyllou,2020-10-06 Essay from the year 2014 in the subject

Didactics E Learning grade 10 University of Macedonia language English abstract This study investigates the second generation of the World Wide Web called Web 2.0 The revolution of Web 2.0 over Web 1.0 was that it allowed Internet users not to be passive recipients who simply read the digital content of a web page but enabled them to add digital content share information and collaborate online The blast of Web 2.0 is therefore largely based on the electronic sharing of knowledge and information In this paper the basic features of Web 2.0 its basic services functions and tools will be firstly described Next concepts such as social networking services and social networks will be analyzed and the application of Web 2.0 in education as well as the benefits it can bring will be studied In conclusion a summary of the possibilities of Web 2.0 is made and the advantages disadvantages and its role in the educational process are presented through a critical point of view One of the major differences between Web 2.0 and the traditional World Wide Web is the greater collaboration between Internet users and other users such as digital service providers and businesses While Web 1.0 was software organized around pages technologies and businesses Web 2.0 was organized around ordinary people and services In the Web 1.0 era internet users had the ability to read the digital content of a web page but could not create their own since the only person who could update the web page content was its webmaster In other words we would say that Web 1.0 was not oriented towards the creation of digital content by internet users
