Reshaping the Video Game Landscape With AI and GenAI Sousa, João Paulo Pereira,Tavares, Rogério Junior Correia,2025-11-26 AI and GenAI are revolutionizing the video game industry From procedurally generated worlds and non playable characters to personalized gameplay experiences these technologies are transforming how games are developed and experienced Game studios are increasingly using AI and GenAI to streamline content creation and enhance realism ultimately pushing the boundaries of what games can achieve This reshaping of the video game landscape not only redefines entertainment but also opens new possibilities for education social interaction and digital economies within virtual environments Reshaping the Video Game Landscape With AI and GenAI explores how AI and GenAI have affected the video gaming world This book demonstrates how AI and GenAI can improve development workflows create new player experiences and support inclusive and ethical design Covering topics such as AI gaming and development this book is an excellent resource for researchers academicians game designers and industry professionals **Brand Creation and Management in the Phygital Era** Djakeli, Kakhaber,2025-05-29 In the evolving digital era the fusion of physical and digital brand experiences known as phygitalization has become essential for brand relevance and success As consumers increasingly expect seamless meaningful interactions across both online and offline spaces brands must strategically balance digital innovation with emotional authenticity Effective brand management today involves not only delivering quality and efficiency but also creating culturally resonant personalized experiences that inspire loyalty and action This shift transforms branding from a corporate asset into a cultural symbol deeply embedded in the identity and values of the communities it serves This ability to master this synergy defines a brand s competitive edge in the 21st century Brand Creation and Management in the Phygital Era discusses in depth how to create and manage brands in physical and digital environments taking into consideration the complexities and opportunities of phygitalization It offers practical strategies research insights and neuro branding techniques to build emotionally resonant and culturally relevant brands in a hybrid world Covering topics such as brand credibility influencer marketing and virtual reality VR this book is an excellent resource for entrepreneurs marketers managers students educators business leaders researchers academicians and more **Artificial Intelligence & Games** Georgi Togeli,2024-09-03 As has been pointed out by several industrial game AI developers the lack of behavioral modularity across games and in game tasks is detrimental for the development of high quality AI 605 171 An increasingly popular method for ad hoc behavior authoring that eliminates the modularity limitations of FSMs and BTs is the utility based AI approach which can be used for the design of control and decision making systems in games 425 557 Following this approach instances in the game get assigned a particular utility function that gives a value for the importance of the particular instance 10 169 For instance the importance of an enemy being present at a particular distance or the importance of an agent s health being low in this particular context Given the set of all utilities available to an agent and all the options it has

utility based AI decides which is the most important option it should consider at this moment 426 The utility based approach is grounded in the utility theory of economics and is based on utility function design The approach is similar to the design of membership functions in a fuzzy set A utility can measure anything from observable objective data e g enemy health to subjective notions such as emotions mood and threat The various utilities about possible actions or decisions can be aggregated into linear or non linear formulas and guide the agent to take decisions based on the aggregated utility The utility values can be checked every n frames of the game So while FSMs and BTs would examine one decision at a time utility based AI architectures **A Practical Guide to Artificial Intelligence in Higher Education: Innovation and Applications** Mageswaran Sanmugam,Zuheir N.
