Strangers Next Door? Tim Lindsey, Dave McRae, 2018-02-22 There are no two neighbouring countries anywhere in the world that are more different than Indonesia and Australia They differ hugely in religion language culture history geography race economics worldview and population Indonesia 270 million Australia less than 10 per cent of that In fact Indonesia and Australia have almost nothing in common

other than the accident of geographic proximity This makes their relationship turbulent volatile and often unpredictable Strangers Next Door brings together insiders and leading observers to critically assess the state of Australia Indonesia relations and their future prospects offering insights into why the relationship is so important for Australia why it is so often in crisis and what this means for the future This book will be of interest to anyone concerned with the Indo Pacific region Southeast Asia Australia and Indonesia and each country s politics economy and foreign policy It contains chapters that will interest specialists but are written in a style accessible to a general audience The book spans a diverse range of subjects including political relations and diplomacy security and defence the economy and trade Islam education development the arts legal cooperation the media women and community ties Contributors assess the current state of relations in their sphere of expertise and outline the factors and policies that could shape bilateral ties and Indonesia s future over the coming decades University of Melbourne scholars Tim Lindsey and Dave McRae both prominent observers and commentators on Indonesia and its relations with Australia edited the volume providing a synthesising overview as well as their own thematic chapters

Insect Diversity, Declines and Conservation in Australia Tim R. New, 2022-03-02 Problems of insect enumeration and assessment of needs are addressed in the contexts of rapid and substantial losses and changes to all key Australian terrestrial and freshwater environments and promoting awareness of the importance of insects Further definition of the insect fauna and its peculiarities can aid threat alleviation and practical management to protect and conserve this unique and largely endemic biodiversity Written for the many environmental managers and naturalists who are not primarily entomologists the ten chapters expand from considerations of insect decline and diversity to the unique features of the Australian fauna and its characterisation Cases and examples from throughout the world illustrate the major needs approaches and priorities to sustaining a poorly known diverse and ecologically varied insect heritage of global significance
