*Australian Movies and the American Dream* Glen Lewis, 1987-11-17 This book is thorough, well organized and useful. It establishes background on the Australian understanding of the American dream, Australian photography, image and subject matter and American influence on Australian cinema. Brief chapters summarize film theory, applicable mass communication theory and

financial practices of the Australian motion picture industry Choice presents an examination of major movies made in Australia in the late 1970s and early 1980s The author argues that part of the reason for the success of Australian cinema in recent years may lie with America s identification with a simpler culture an almost wild west atmosphere To explore his thesis the author first offers a short history of the Australian cinema and then a theory of film as mass communication

Communication Booknotes Lewis introduces Australian films from the 1920 s and 30 s and then focuses on thirty films produced between 1975 and 1987 He suggests that part of the reason for Australia s film success may lie in America s identification with a simpler culture and the portrayal of wild west type territory which is often found in Australian films He also points out that various aspects of American culture have seeped into Australian culture and now appear in their films making them more appealing to an American audience He concludes this insightful study with a projection analysis for the future of Australian cinema With its up to date content and analytical approach this book will be valuable to anyone concerned with mass communication and society cinema studies media or U S Australian relations **Australia '99** Fodor's Travel Publications, Inc.
