Australia's Bid For The Atomic Bomb:

Australia's Bid For The Atomic Bomb Reynolds, Wayne, 1997-02-11 This very important work is a fundamental rewriting of Australian history from 1943 to 1968 It argues that after World War II Australian defence policy was premised on Joint nuclear weapons development with the United Kingdom and that while this endeavour failed it shaped domestic and foreign policy until the end of the 1950s Nuclear weapons have traditionally been seen as American and British concerns and various official histories have held that the development of rockets and atomic weapon testing were essentially British exercises But author Wayne Reynolds reveals an entirely new perspective on Australia's role in these events Australia's Bid for the Atomic Bomb examines the implications of this for major social political and security issues and developments in Australia's recent history This work will arouse considerable media interest and will appeal to anyone interested in Australia's political and military history

Britain, Europe and Civil Nuclear Energy, 1945-62 Martin Theaker, 2018-03-15 This book examines the role played by civil nuclear energy in Britain's relationship with Europe between the end of the Second World War and London's first application to join the European Communities Tracing the development of the British nuclear programme as it emerged as a global leader in constructing the world's first atomic power stations it analyses how the threat of energy shortages throughout the 1950s presented ministers with a golden opportunity to utilise nuclear cooperation as an instrument to influence the political shape of Europe Importantly this book will show how this chance was missed by ministers due to a combination of disorganization and diplomatic pressure as well as a perennial lack of domestic resources In so doing this book joins the long disconnected historiographies of European integration and nuclear energy to offer a new perspective on both scholarly fields

[The Consequences of American Nuclear Disarmament](#) Christine M. Leah, 2017-02-18 This book is about the future of nuclear weapons geopolitics and strategy It examines the legacy of nuclear weapons on US thinking about some concepts of strategy and geopolitics namely deterrence extended deterrence alliances and arms control The purpose of this is to demonstrate just how fundamentally nuclear weapons have influenced American thinking about these concepts It argues that given the extent of nuclear weapons influence on these concepts and the implications for

international security further reductions beyond current Strategic Arms Reduction Talks START levels and the more absolute idea of nuclear disarmament may not necessarily be prudent ideas Nuclear weapons have contributed to the avoidance of major war between states made alliances more credible and last longer and have made arms control relatively easier to conceptualize and manage As such the author argues these concepts may become even more difficult to manage in a world where nuclear weapons are marginalized

Menzies Ascendancy Zachary Gorman,2024-12-03 Was Menzies s unprecedented electoral success merely a matter of luck or did he make fortune bend to his will On 30 November 1954 Robert Menzies became Australia s longest serving prime minister Between the closely fought 1954 and 1961 elections the Coalition enjoyed a political dominance that allowed it to reshape the nation The period saw the creation of the Reserve Bank of Australia the signing of the landmark Commerce Agreement with Japan vast investment in Australia s universities the development of Canberra the opening of Australia s first nuclear reactor forgotten but transformative healthcare reforms the abolition of the dictation test forward progress on Indigenous policy the signing of an enduring Antarctic Treaty and more Yet to critics this was a time when the opportunity for reform was wasted Has Menzies s deliberate emphasis on continuity over change obscured his achievements Is consolidated progress preferable to policy revolution And what does the Australian public want from its leaders All these issues are explored in the third of a four volume history of Menzies and his world based on conferences convened by the Robert Menzies Institute at the University of Melbourne Contributors include Robert Bowker Andrew Bragg Paul Brown Elizabeth Buchanan Selwyn Cornish Damien Freeman David Furse Roberts Anne Henderson Paul Kelly Sean Jacobs David Lee Ted Ling Lyndon Megarrity Greg Melleuish Andrew Norton Michael de Percy Paul Strangio and Stephen Wilks

Partners in deterrence Stephan Frühling,Andrew O'Neil,2021-08-03 From the dawn of the atomic age to today nuclear weapons have been central to the internal dynamics of

US alliances in Europe and Asia But nuclear weapons cooperation in US alliances has varied significantly between allies and over time This book explores the history of America s nuclear posture worldwide delving into alliance structures and interaction during and since the end of the Cold War to uncover the underlying dynamics of nuclear weapons cooperation between the US and its allies Combining in depth empirical analysis with an accessible theoretical lens the book reveals that US allies have wielded significant influence in shaping nuclear weapons cooperation with the US in ways that reflect their own often idiosyncratic objectives Alliances are ecosystems of exchange rather than mere tools of external balancing the book argues and institutional perspectives can offer an unprecedented insight into how structured cooperation can promote policy convergence
