Hung, 2006-07-04 Gerry Stahl Drexel University Philadelphia USA The theme of engaged learning with emerging technology is a timely and important one This book proclaims the global relevance of the topic and sharpens its focus I would like to open the book by sketching some of the historical context and dimensions of application before the chapter authors provide the substance Engagement with the world To be human is to be engaged with other people in the world Yet there has been a dominant strain of thought at least in the West that directs attention primarily to the isolated individual as naked mind From classical Greece to modern times engagement in the daily activities of human existence has been denigrated Plato 340 BC 1941 banished worldly engagement to a realm of shadows removed from the bright light of ideas and Descartes 1633 1999 even divorced our minds from our own bodies It can be suggested that this is a particularly Western tendency supportive of the emphasis on the individual agent in Christianity and capitalism But the view of people as originally unengaged has spread around the globe to the point where it is now necessary everywhere to take steps to reinstate engagement through explicit efforts Perhaps the most systematic effort to rethink the nature of human being in terms of engagement in the world was Heidegger's 1927 1996 He argued that human existence takes place through our concern with other people and things that are meaningful to us **Oxford Textbook of Global Public Health** Roger Detels, Quarraisha Abdool Karim, Fran Baum, Liming Li, Alastair H.
