## **Automated Model Building:**

**Macromolecular Crystallography** Mark R. Sanderson, Jane V. Skelly, 2007-08-23 Macromolecular Crystallography is the study of macromolecules proteins and nucleic acids using X ray crystallographic techniques in order to determine their molecular structure The knowledge of accurate molecular structures is a pre requisite for rational drug design and for structure based function studies to aid the development of effective therapeutic agents and drugs The successful determination of the complete genome genetic sequence of several species including humans has recently directed scientific attention towards identifying the structure and function of the complete complement of proteins that make up that species a new and rapidly growing field of study called structural genomics There are now several important and well funded global initiatives in operation to identify all of the proteins of key model species One of the main requirements for these initiatives is a high throughput crystallization facility to speed up the protein identification process The extent to which these technologies have advanced calls for an updated review of current crystallographic theory and practice This practical reference book features the latest conventional and high throughput methods and includes contributions from a team of internationally recognized leaders and experts It will be of relevance and use to graduate students research scientists and professionals currently working in the field of conventional and high throughput macromolecular crystallography Structural Genomics and High Throughput Structural Biology Michael Sundstrom, Martin Norin, Aled Edwards, 2005-08-23 Researchers in structural genomics continue to search for biochemical and cellular functions of proteins as well as the ways in which proteins assemble into functional pathways and networks using either experimental or computational approaches Based on the experience of leading international experts Structural Genomics and High Throughput Stru *Phasing in Crystallography* Carmelo Giacovazzo, 2014 The book describes phasing techniques in modern crystallography The main text is dedicated to their simple description and further mathematical details are contained in the appendices Practical aspects are described for each specific method making it a useful tool for the daily work of practising crystallographers **Towards Sustainable Customization: Bridging Smart Products and Manufacturing Systems** Ann-Louise Andersen, Rasmus Andersen, Thomas Ditlev Brunoe, Maria Stoettrup Schioenning Larsen, Kjeld Nielsen, Alessia Napoleone, Stefan Kjeldgaard, 2021-10-31 This book features state of the art contributions from two well established conferences Changeable Agile Reconfigurable and Virtual Production Conference CARV2020 and Mass Customization and Personalization Conference MCPC2020 Together they focus on the joint design development and management of products production systems and business for sustainable customization and personalization The book covers a large range of topics within this domain ranging from industrial success factors to original contributions within the field **Intelligent Computing and Block Chain** Wanling Gao, Kai Hwang, Changyun Wang, Weiping Li, Zhigang Qiu, Lei Wang, Aoying Zhou, Weining Qian, Cheqing Jin, Zhifei Zhang, 2021-03-10 This book constitutes the refereed post conference proceedings of the Second BenchCouncil
