America Adopts the Automobile, 1895-1910 James J. Flink,1970 Between 1895 and the late 1920 s American civilization was transformed by the automobile and the automobile industry In *America Adopts the Automobile 1895 1910* James J Flink writes about the formation of an American automobile culture during the period from the introduction of the motor vehicle into the United States in 1895 to the opening of the Ford Motor Company s Highland Park plant on January 1 1910 He concludes that Americans by 1910 were committed to automobility and that with the development of a mass market for motorcars the automobile industry in America had reached a critical turning point From then on the automobile and the automobile industry called the tune and set the tempo of modern American life In contrast to earlier historians of the automobile Professor Flink avoids narrow concentration on the automobile industry and its product He focuses instead on the automobile as a factor influencing and influenced by American civilization The molding of a favorable public opinion of the automobile by the press the growth of automobile clubs the evolution of legislation intended to regulate the motor vehicle the development of roads and services for the motorist and

regional class and occupational differences in automotive innovativeness these are some of the topics that are dealt with adequately for the first time in this authoritative volume Forty six full page illustrations augment the text Familiar topics are also viewed from a fresh perspective Having made an exhaustive study of the automobile trade journals and popular periodicals of the period Professor Flink was able to relate the developments in automotive technology and in the automobile industry to the sociocultural milieu within which these developments took place He reaches some novel conclusions He demonstrates for example that from the first the organization of the automobile industry and the industry's technological accomplishments lagged behind the public's expectations that a reliable cheap car for the masses would soon appear and inaugurate a utopian horseless age Well before Henry Ford came out with his legendary Model T popular opinion of the automobile was overwhelmingly favorable and many people thought that automobility was a panacea for society's ills America Adopts the Automobile 1895 1910 is the first comprehensive scholarly account of the origins of the American automobile revolution It adds a new dimension to our understanding of twentieth century American civilization

Modernizing Tradition Adam C. Stanley, 2008-12-15 In the turbulent decades after World War I both France and Germany sought to return to an idealized prewar past Many people believed they could recapture a sense of order and stability by reinstating traditional gender roles which the war had thrown off balance While French and German women necessarily filled men's roles in factories and other jobs during the war those who continued to lead active working lives after World War I risked being called modern women Far from a compliment this derogatory label encompassed everything society found threatening about women's new place in public life smoking working women who preferred independence and sexual freedom to a traditional role in the home Society felt threatened by the image of the modern woman yet also realized that conceptions of femininity needed to accommodate the cultural changes brought about by the Great War In Modernizing Tradition Adam C Stanley explores how interwar French and German popular culture used commercial images to redefine femininity in a way that granted women some access to modern life without encouraging the assertion of female independence Examining advertisements articles and cartoons as well as department store publicity materials from the popular press of each nation Stanley reveals how the media attempted to convince women that with the help of newly available consumer goods such as washing machines refrigerators and vacuum cleaners being a mother or a housewife could be empowering even liberating A life devoted to the home these images promised need not be an unmitigated return to old fashioned tradition but could offer a rewarding lifestyle based on the wonders and benefits of modern technology Stanley shows that the media carefully limited women's association with modernity to those activities that reinforced women's traditional roles or highlighted their continued dependence on masculine guidance expertise and authority In this cross national study Stanley brings into sharp relief issues of gender and consumerism and reveals that despite the larger political differences between France and Germany gender ideals in the two countries remained virtually identical between the world

wars That these concepts of gender stayed static over the course of two decades years when nearly every other aspect of society and culture seemed to be in constant flux attests to their extraordinary power as a force in French and German society
