Semiotic Investigations A. W. McHoul,1996-01-01 In *Semiotic Investigations* Alec McHoul develops a theory of meaning that he calls effective semiotics a theory that investigates the ways in which signs have meaning by virtue of their actual uses McHoul expounds his theory of effective semiotics of meaning as use in a series of provocative chapters on diverse topics He begins by examining the relations between semiotics and history and between semiotics and specific communities He elaborates on the nature of these relations by demonstrating the effective semiotics of a particular photograph from the 1880s episodes from the film *Singin in the Rain* and the *Batman* comics literary works children s primers popular accounts of science and many other objects artifacts and experiences *Semiotic Investigations* advances its own comprehensive theory of signs while ably examining works by such distinguished philosophers and theorists as Nietzsche Wittgenstein Derrida Foucault Habermas Lyotard Kuhn and others Yet the book is also down to earth and clearly written with an eye towards a startling range of ordinary and uncommon experiences It will be required reading for linguists philosophers semioticians anthropologists literary theorists and students of cultural studies

Sign Crossroads in Global Perspective Susan Petrilli,2017-09-08 Language is the species specific human version of the animal system of communication In contrast to non human animals language enables humans to invent a plurality of possible worlds reflect upon signs be responsible for our actions gain conscious awareness of our

inevitable mutual involvement in the network of life on this planet and be responsibly involved in the destiny of the planet. The author looks at semiotics, the study of signs, symbols, and communication, as developing sequentially rather than successively, more synchronically than diachronically. She discusses the contemporary phenomenon that people in today's society have witnessed and participated in as part of the development of semiotics. Although there is a long history preceding semiotics, in a sense, the field is as a phenomenon more of our time than of any time past. Its leading figures, whom Petrilli examines, belong to the twentieth and twenty-first centuries. Semiotics is associated with a capacity for listening. This capacity is also the condition for reconnecting to and recovering the ancient vocation of semiotics as that branch of medical science relating to the interpretation of signs or symptoms. The pragmatic aspect of global semiotics studies the impact of language or signs on those who use them and looks for consequences in actual practice. In this respect, Petrilli theorizes that the task for semiotics in the era of globalization is nothing less than to take responsibility for life in its totality.

A Semiotic Methodology for Animal Studies Pauline Delahaye, 2019-11-13. This monograph is about new perspectives in animal studies methodology by using concepts and tools from the field of semiotics. It proposes a reflexion on current challenges and issues in the ethology field and introduces different semiotics: biosemiotics, zoosemiotics, as potential methodological solutions. The chapters cover many aspects of ethology where semiotics can be a helpful hand: studies of language, culture, cognition, or emotions; issues about complex, endangered, or variable species. It explains why these points are difficult to study for actual ethology, why they still matter for researchers, biodiversity actors, or wildlife programs, and how an interdisciplinary study with a semiotic point of view can help understand them. This book will appeal to a wide readership: from researchers and academics in living sciences, as well as in linguistics fields, to other professionals: veterinarians, wildlife managers, zookeepers, and many others who feel the need to better understand some aspects of animals they are working with. Students with an animal focus should read this book as an introduction to interdisciplinary methodology and a proposition to work differently with animals.
