A Theory In Conflict

Johan Galtung

A Theory In Conflict:

Game Theory as a Theory of Conflict Resolution Anatol Rapoport, 1974-05-31 Game theory could be formally defined as a theory of rational decision in conflict situations. Models of such situations as they are conceived in game theory involve 1 a set of decision makers called players, 2 a set of strategies available to each player, 3 a set of outcomes, each of which is a result of particular choices of strategies made by the players on a given play of the game, and 4 a set of payoffs accorded to each player in each of the possible outcomes. It is assumed that each player is individually rational in the sense that his preference ordering of the outcomes is determined by the order of magnitudes of his and only his associated payoffs. Further, a player is rational in the sense that he assumes that every other player is rational in the above sense. The rational player utilizes knowledge of the other players' payoffs in guiding his choice of strategy because it gives him information about how the other players' choices are guided. Since in general the orders of magnitude of the payoffs that accrue to the several players in the several outcomes do not coincide, a game of strategy is a model of a situation involving conflicts of interests.

Using Conflict Theory Otomar J. Bartos, Paul Wehr, 2002-07-15 Human conflict from family feuds to labor strikes to national warfare is an ever present and universal social problem and the methods to manage it a challenge for everyone from average citizens to policymakers and social theorists. Using Conflict Theory will educate students about how, under what conditions, and why conflict erupts and how it can be managed. It is a unique classroom book blending theory and practical application and the first to bridge for students the science of social theory and the art of practice.

A Theory of Conflict Judith Lachman, Sloan School of Management, 1987

Towards a Theory of United Nations Peacekeeping A.B. Fetherston, 1994-12-13 At a time when peacekeepers are struggling to fulfil increasingly demanding mandates and UN peacekeeping is in danger of losing the distinct character that won it the 1988 Nobel Peace Prize, this important book argues for a clear theoretical redefinition within a conflict resolution framework and examines the practical implications for training. This is a valuable and original contribution to the peacekeeping literature. Dr Oliver Ramsbotham, Department of Peace Studies, University of Bradford. Both for the blue helmets on the ground and for the diplomats at UN headquarters, conflict resolution skills are essential for conducting peacekeeping operations. Betts Fetherstone's excellent study points the way forward to a synthesis between conflict management and peacekeeping. Hugh Miall, Research Fellow, European Programme, Royal Institute of International Affairs. The prevailing over-taxed ad hoc system of peacekeeping does not meet the growing demands posed by the post-Cold War world. This volume argues that peacekeeping needs to be placed on firm conceptual footing directly congruent with its peaceful third party role. The implications of this conceptualisation of peacekeeping for practice are then discussed. Training is cited as a key means of translating conceptual understanding into practice. Without this foundation work, UN has little chance of changing its existing and largely ineffective system of conflict management. At a time when peacekeepers are struggling to fulfil increasingly demanding mandates and UN peacekeeping is in danger of

losing the distinct character that won it the 1988 Nobel Peace Prize this important book argues for a clear theoretical redefinition within a conflict resolution framework and examines the practical implications for training This is a valuable and original contribution to the peacekeeping literature Handbook of Social Theory George Ritzer, Barry Smart, 2001-01-02 This book is an indispensable resource for anyone interested in the roots current debates and future development of social theory It draws together a team of outstanding international scholars and presents an authoritative and panoramic critical survey of the field The volume is divided into three parts The first part examines the classical tradition Included here are critical discussions of Comte Spencer Marx Durkheim Weber Simmel Mead Freud Mannheim and classical feminist thought This part conveys the classical tradition as a living resource in social theory it demonstrates not only the critical significance of classical writings but their continuing relevance The second part moves on to examine the terrain of contemporary social theory The contributions discuss the significance and strengths and weaknesses of structural functionalism recent Marxian theory critical theory symbolic interactionism phenomenology ethnomethodology exchange theory rational choice contemporary feminism multiculturalism postmodernism the thought of Foucault and Habermas and figurational sociology The reader gains a comprehensive and informed picture of the key issues and central figures of the day The final part ranges over the key debates in current social theory Questions relating to positivism metatheorizing cultural studies consumption sexualities the body globalism nationalism socialism knowledge societies ethics and morality as well as post social relations are fully discussed The dilemmas and promise of contemporary social theory are revealed with pinpoint accuracy *A Theory of Conflict* Judith A. Lachman, 2015-06-26 Excerpt from *A Theory of Conflict* Disputes not resolved by negotiation may lead to conflict This paper investigates the course and outcome of such conflict between two parties who respond with aggressive behavior to injury experienced at low levels but become submissive in response to sufficiently high levels of harm Legal sanctions analyzed in terms of the marginal penalty associated with increased harm may affect the occurrence or outcome of conflict The paper finds however that a policy tradeoff exists between deterring the occurrence of conflict and limiting the harm in conflicts which do occur Moreover the different effects of legal sanctions can be enhanced or viliated by other forms of sanction such as social sanctions and sanctions internalized by the individual party Conflict behavior is also affected by the availability or prices of activities which serve as alternatives to conflict Finally because equilibria at low levels of harm may be unstable under sore conditions the conflict can easily escalate in an arms race fashion to much greater levels of harm Although applicable in a variety of dispute contexts the theory is developed more fully here in the context of disputes between individuals and then examined briefly in its application to the labor relations setting About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in
