Approaching Human Geography:

Approaching Human Geography Paul Cloke, Chris Philo, David Sadler, 1991-04-28 This introduction to the development of new theoretical approaches to human geography sets out to explain the key features of these new approaches and to trace their antecedents and implications. The authors also highlight points of comparison and contrast, interconnection and dissimilarity. An introductory chapter describes and accounts for the theoretical diversity present within twentieth-century human geography and particular attention is paid to the transition from environmental and regional approaches to the spatial science of the 1960s. This chapter then sets the stage for the later chapters which deal systematically with different post-1960s approaches: Marxism, humanism, realism, structuration and postmodernism. Each of these chapters deals with the chronological development of the appropriate literature, describes the key claims and arguments, and then presents a worked example to illustrate the benefits and pitfalls of an approach in practice. A concluding chapter re-integrates the diverse themes and reflects briefly on possible future theoretical developments in human geography in the 1990s. The principal chapters of the book are framed by both a preface and an epilogue which address questions about relativism in approaching human geography while also stressing the need for continued commitment and critical sensitivity in geographical enquiry. The book is written in an easily accessible style with generous expositions of key claims and arguments and thorough cross-referencing between chapters.

Approaches to Human Geography Stuart C. Aitken, Gill Valentine, 2014-12-01 The book covers some of the traditionally most obtuse and difficult to grasp philosophical ideas that have influenced geographers and geography. The fact that these are presented in an inclusive and accessible manner is a key strength. Many students have commented that the chapters they have read have encouraged them to read more in this field, which is fantastic from a lecturer's perspective. Richard White, Sheffield Hallam University. A new edition of the classic *Approaches* text for students, organised in three sections which overview and explain the history and philosophy of Human Geographies in all its applications by those who practise it. Section One: Philosophies: Positivist Geography, Humanism, Feminist Geographies, Marxisms, Structuration Theory, Human-Animal Realism, Postmodern Geographies, Poststructuralist Theories, Actor-Network Theory, Postcolonialism, Geohumanities, Technologies. Section Two: People, Institutions and Cultures, Places and Contexts, Memories and Desires, Understanding Place, Personal and Political, Becoming a Geographer, Movement and Encounter, Spaces and Flows, Places as Thoughts. Section Three: Practices: Mapping and Geovisualization, Quantification, Evidence and Positivism, Geographic Information Systems, Humanism, Activism, Feminist Geographies, Poststructuralist Theories, Psychoanalysis, Environmental Inquiry, Contested Geographies and Culture Wars. Fully updated throughout and with eight brand new chapters, this is the core text for modules on history, theory and practice in Human Geography.

Approaches to Human Geography Stuart Aitken, Gill Valentine, 2006-01-27 *Approaches to Human Geography* is the essential student primer on theory and practice in Human Geography. It is a systematic review of the key ideas and debates informing post-war

geography explaining how those ideas work in practice Avoiding jargon while attentive to the rigor and complexity of the ideas that underlie geographic knowledge the text is written for students who have not met philosophical or theoretical approaches before This is a beginning guide to geographic research and practice **Approaching Human Geography** Paul J. Isenberg,2017 The Oxford Handbook of Environmental History draws on a wealth of new scholarship to offer diverse perspectives on the state of the field Objects of Social Science Eleonora Montuschi,2003-12-01 Presents a clear and structured analysis of the Philosophy of Social Science across each of its main disciplines Anthropology Sociology History Economics and Geography Using a range of examples from specific social sciences the book both identifies the practical and theoretical procedures involved in the identification of the object and at the same time raises questions about the very objectivity of these procedures in analyzing the object

Geography Into the Twenty-First Century Eleanor M. Rawlings, Richard A. Daugherty, 1996-05 This volume contains essays which describe key developments in the areas of human physical and environmental geography over the 20th century.
