Personal Adornment and the Construction of Identity Hannah V. Mattson, 2021-06-09 Objects of adornment have been a subject of archaeological historical and ethnographic study for well over a century Within archaeology personal ornaments have traditionally been viewed as decorative embellishments associated with status and wealth materializations of power relations and social strategies or markers of underlying social categories such as those related to gender class and ethnic affiliation Personal Adornment and the Construction of Identity seeks to understand these artefacts not as signals of steady pre-existing cultural units and relations but as important components in the active and contingent constitution of identities Drawing on contemporary scholarship on materiality and relationality in archaeological and social theory this book uses one genre of material culture items of bodily adornment to illustrate how humans and objects construct one another Providing case studies spanning 10 countries three continents and more than 9 000 years of human history the authors demonstrate the myriad and dynamic ways personal ornaments were intertwined with embodied practice and identity performativity the creation and remaking of social memories and relational collections of persons materials and practices in the past The authors careful analyses of production methods and composition curation heirlooming and reworking decorative attributes and iconography position within assemblages and depositional context illuminate the varied material and relational axes along which objects of adornment contained social value and meaning When paired with the broad temporal and geographic scope collectively represented by these studies we gain a deeper appreciation for the subtle but vital roles these

items played in human lives *Ruin Memories* Bjørnar Olsen, Þóra Pétursdóttir, 2014-04-24 Since the nineteenth century mass production consumerism and cycles of material replacement have accelerated increasingly larger amounts of things are increasingly victimized rapidly and made redundant At the same time processes of destruction have immensely intensified although largely overlooked when compared to the research and social significance devoted to consumption and production The outcome is a ruin landscape of derelict factories closed shopping malls overgrown bunkers and redundant mining towns a ghostly world of decaying modern debris normally omitted from academic concerns and conventional histories The archaeology of the recent or contemporary past has grown fast during the last decade This development has been concurrent with a broader popular artistic and scholarly interest in modern ruins in general *Ruin Memories* explores how the ruins of modernity are conceived and assigned cultural value in contemporary academic and public discourses reassesses the cultural and historical value of modern ruins and suggests possible means for reaffirming their cultural and historic significance Crucial for this reassessment is a concern with decay and ruination and with the role things play in expressing the neglected unsuccessful and ineffable Abandonment and ruination is usually understood negatively through the tropes of loss and deprivation things are degraded and humiliated while the information knowledge and memory embedded in them become lost along the way Without even ignoring its many negative and traumatizing aspects a main question addressed in this book is whether ruination also can be seen as an act of disclosure If ruination disturbs the routinized and ready to hand to what extent can it also be seen as a recovery of memory as exposing meanings and presences that perhaps are only possible to grasp at second hand when no longer immersed in their withdrawn and useful reality Anybody interested in the archaeology of the contemporary past will find *Ruin Memories* an essential guide to the very latest theoretical research in this emerging field of archaeological thought **Contemporary Archaeology in Theory** Robert W. Preucel, Stephen A. Mrozowski, 2010-05-10 The second edition of *Contemporary Archaeology in Theory The New Pragmatism* has been thoroughly updated and revised and features top scholars who redefine the theoretical and political agendas of the field and challenge the usual distinctions between time space processes and people Defines the relevance of archaeology and the social sciences more generally to the modern world Challenges the traditional boundaries between prehistoric and historical archaeologies Discusses how archaeology articulates such contemporary topics and issues as landscape and nature's agency meaning and practice sexuality embodiment and personhood race class and ethnicity materiality memory and historical silence colonialism nationalism and empire heritage patrimony and social justice media museums and publics Examines the influence of American pragmatism on archaeology Offers 32 new chapters by leading archaeologists and cultural anthropologists **The Materiality of Freedom** Jodi A. Barnes, 2011 As these essays open new vistas on the social construction of race and racism they demonstrate a more hopeful view on the building of black communities and in the United States and the Caribbean *An Archaeology of the Cosmos* Timothy R. Pauketat, 2013 *An Archaeology of the Cosmos*

seeks answers to two fundamental questions of humanity and human history The first question concerns that which some use as a defining element of humanity religious beliefs Why do so many people believe in supreme beings and holy spirits The second question concerns changes in those beliefs What causes beliefs to change Using archaeological evidence gathered from ancient America especially case material from the Great Plains and the pre Columbian American Indian city of Cahokia Timothy Pauketat explores the logical consequences of these two fundamental questions Religious beliefs are not more resilient than other aspects of culture and society and people are not the only causes of historical change An Archaeology of the Cosmos examines the intimate association of agency and religion by studying how relationships between people places and things were bundled together and positioned in ways that constituted the fields of human experience This rethinking theories of agency and religion provides readers with challenging and thought provoking conclusions that will lead them to reassess the way they approach the past

Cosmopolitan Archaeologies Lynn Meskell,2009-04-17 An important collection Cosmopolitan Archaeologies delves into the politics of contemporary archaeology in an increasingly complex international environment The contributors explore the implications of applying the cosmopolitan ideals of obligation to others and respect for cultural difference to archaeological practice showing that those ethics increasingly demand the rethinking of research agendas While cosmopolitan archaeologies must be practiced in contextually specific ways what unites and defines them is archaeologists acceptance of responsibility for the repercussions of their projects as well as their undertaking of heritage practices attentive to the concerns of the living communities with whom they work These concerns may require archaeologists to address the impact of war the political and economic depredations of past regimes the livelihoods of those living near archaeological sites or the incursions of transnational companies and institutions The contributors describe various forms of cosmopolitan engagement involving sites that span the globe They take up the links between conservation natural heritage and ecology movements and the ways that local heritage politics are constructed through international discourses and regulations They are attentive to how communities near heritage sites are affected by archaeological fieldwork and findings and to the complex interactions that local communities and national bodies have with international sponsors and universities conservation agencies development organizations and NGOs Whether discussing the toll of efforts to preserve biodiversity on South Africans living near Kruger

Association,2008 **Archaeological Review from Cambridge** ,2006 The Archaeology of Destruction Lila Rakoczy,2008 Buildings and landscapes are traditionally analysed with their construction and use in mind with less interest shown in their destruction or end TM This innovative book canvassing the opinions of historians archaeologists and other professionals highlights the complexity of destruction both as a concept and a phenomenon Drawing from a variety of time periods and cultures it explores the multiplicity of meanings that destruction can have and the many complications this creates Included in this are the politics behind how destruction is remembered or forgotten the logistical and ethical dilemmas it presents us with and the power tensions and transitions that often accompany it One of the most fundamental themes explored in this book is what destruction is who defines it and how we choose to recognise it and why these questions need to be debated It clearly demonstrates the importance of understanding the complexity of destructive acts and argues that the best way to achieve this is by establishing channels of dialogue between archaeologists and other disciplines
