Neuronal and Cognitive Effects of Oestrogens Derek J. Chadwick,Jamie A. Goode,2003-10-31 Although normally thought of as a sex hormone recent research has highlighted the numerous and significant effects that oestrogen has on the CNS extending far beyond its important reproductive role It has been shown that oestrogen acts as a neural growth factor with important influences on the survival plasticity regeneration and ageing of the mammalian brain This exciting book brings together leading clinicians and researchers to discuss oestrogen s basic mechanisms of action the extrahypothalamic brain regions it affects and its influence on cognitive functions in animals and humans Finally recent research on the role of oestrogens in ageing and dementia including the significance of oestrogen action in Alzheimer s disease is discussed The 15 papers contained in this book together with the extensive discussion sessions that follow them reveal much new and exciting work in this area and identify promising new research directions *Actes Et Documents* ,1951 **Communication**

Efficient Federated Learning for Wireless Networks Mingzhe Chen,Shuguang Cui,2024-02-19 This book provides a comprehensive study of Federated Learning FL over wireless networks It consists of three main parts a Fundamentals and preliminaries of FL b analysis and optimization of FL over wireless networks and c applications of wireless FL for Internet of Things systems In particular in the first part the authors provide a detailed overview on widely studied FL framework In the second part of this book the authors comprehensively discuss three key wireless techniques including wireless resource management quantization and over the air computation to support the deployment of FL over realistic wireless networks It also presents several solutions based on optimization theory graph theory and machine learning to optimize the performance of FL over wireless networks In the third part of this book the authors introduce the use of wireless FL algorithms for autonomous vehicle control and mobile edge computing optimization Machine learning and data driven approaches have recently received considerable attention as key enablers for next generation intelligent networks Currently most existing learning solutions for wireless networks rely on centralizing the training and inference processes by uploading data

generated at edge devices to data centers However such a centralized paradigm may lead to privacy leakage violate the latency constraints of mobile applications or may be infeasible due to limited bandwidth or power constraints of edge devices To address these issues distributing machine learning at the network edge provides a promising solution where edge devices collaboratively train a shared model using real time generated mobile data The avoidance of data uploading to a central server not only helps preserve privacy but also reduces network traffic congestion as well as communication cost Federated learning FL is one of most important distributed learning algorithms In particular FL enables devices to train a shared machine learning model while keeping data locally However in FL training machine learning models requires communication between wireless devices and edge servers over wireless links Therefore wireless impairments such as noise interference and uncertainties among wireless channel states will significantly affect the training process and performance of FL For example transmission delay can significantly impact the convergence time of FL algorithms In consequence it is necessary to optimize wireless network performance for the implementation of FL algorithms This book targets researchers and advanced level students in computer science and electrical engineering Professionals working in signal processing and machine learning will also buy this book
