Arab Conspiracy:

Conspiracy Theories in the Arab World Matthew Gray, 2010-07-12 Conspiracism while not unique to the Middle East is a salient feature of the political discourses of the region This book discounts the common pathological explanation for conspiracism and instead investigates the political structures and dynamics that have created and shaped the phenomenon of conspiracism in the contemporary Middle East

The Medieval Roots of Antisemitism Jonathan Adams, Cordelia Heß, 2018-01-31 This book presents a fresh approach to the question of the historical continuities and discontinuities of Jew hatred juxtaposing chapters dealing with the same phenomenon one in the pre modern one in the modern period How do the circumstances of interreligious violence differ in pre Reformation Europe the modern Muslim world and the modern Western world In addition to the diachronic comparison most chapters deal with the significance of religion for the formation of anti Jewish stereotypes The direct dialogue of small scale studies bridging the chronological gap brings out important nuances anti Zionist texts appropriating medieval ritual murder accusations modern day pogroms triggered by contemporary events but fuelled by medieval prejudices and contemporary stickers drawing upon long inherited knowledge about what a Jew looks like These interconnections however differ from the often assumed straightforward continuities between medieval and modern anti Jewish hatred The book brings together many of the most distinguished scholars of this field creating a unique dialogue between historical periods and academic disciplines

Islamism vs. the West Daniel Pipes, 2023-10-24 The war on terror wars in Iraq and Afghanistan the Arab Israeli conflict again and again in the twenty first century crises coming out of the Middle East confront and puzzle Americans Daniel Pipes has to much acclaim been explaining the region since the 1960s The Wall Street Journal considers him an authoritative commentator on the Middle East and the Washington Post deems him perhaps the most prominent U S scholar on radical Islam The New York Times calls him smart and well informed In this volume Daniel Pipes tackles many questions Are Muslims truly fatalistic as their reputation holds Is radical Islam still on the rise or is it declining Why are substantial numbers of Iranian Muslims converting to Christianity Which American city has emerged as a global center of criminality with female coverings as accessories Why does tension exist between the Jews of Europe and Israel How did it happen that Israel is the only country in the world that did not come into existence through conquest Why are Muslim countries the hold outs in eradicating polio In the skilled hands of a leading Middle East authority these topics come to life as Daniel Pipes explains much about the world s most volatile region

Arabs in the Mirror Nissim Rejwan, 2009-02-17 What is an Arab Though many in the West would answer that question with simplistic stereotypes the reality is far more complex and interesting Arabs themselves have been debating Arab identity since pre Islamic times coming to a variety of conclusions about the nature and extent of their Arabness Likewise Westerners and others have attempted to analyze Arab identity reaching mostly negative conclusions about Arab culture and capacity for self government To bring new perspectives to the question of Arab identity Iraqi born scholar Nissim Rejwan has assembled this fascinating

collection of writings by Arab and Western intellectuals who try to define what it means to be Arab He begins with pre Islamic times and continues to the last decades of the twentieth century quoting thinkers ranging from Ibn Khaldun to modern writers such as al Ansari Haykal Ahmad Amin al Azm and Said Through their works Rejwan shows how Arabs have grappled with such significant issues as the influence of Islam the rise of nationalism the quest for democracy women s status the younger generation Egypt s place in the Arab world Israel s role in Middle Eastern conflict and the West s cultural invasion By letting Arabs speak for themselves Arabs in the Mirror refutes a prominent Western stereotype that Arabs are incapable of self reflection or self government On the contrary it reveals a rich tradition of self criticism and self knowledge in the Arab world

Conflict and War in the Middle East Bassam Tibi,1998-09-28 Few studies of Middle East wars go beyond a narrative of events and most tend to impose on this subject the rigid scheme of superpower competition The Gulf War of 1991 however challenges this view of the Middle East as an extension of the global conflict The failure of the accord of both superpowers to avoid war even once regional superpower competition in the Middle East had ceased must give rise to the question Do regional conflicts have their own dynamic Working from this assumption the book examines local regional constraints of Middle East conflict and how through escalation and the involvement of extra regional powers such conflicts acquire an international dimension The theory of a regional subsystem is employed as a framework for conceptualising this interplay between regional and international factors in Tibi s examination of the Middle East wars in the period 1967 91 Tibi also provides an outlook into the future of conflict in the Middle East in the aftermath of the most recent Gulf War

Arabic in the Fray Yasir Suleiman,2013-07-22 The pre modern period saw a background of inter ethnic strife among Arabs and non Arabs mainly Persians Starting from the symbolic and cognitive roles of language Yasir Suleiman shows how discussions about the inimitability and untranslatability of the Qur an in this period were at some deep level concerned with issues of ethnic election In this respect theology and ethnicity emerge as partners in theorising language Staying within the symbolic role of language Suleiman goes on to investigate the role of paratexts and literary production in disseminating language ideologies and in cultural contestation He shows how language symbolism is relevant to ideological debates about hybrid and cross national literary production in the Arab milieu In fact language ideology appears to be everywhere and a whole chapter is devoted to discussions of the cognitive role of language in linking thought to reality

Antisemitism Michael Fineberg, Shimon Samuels, Mark Weitzman, 2007 Dedicated to the memory of the conscience of the Holocaust Simon Wiesenthal to whom it offers a number of personal tributes this book brings together essays by a wide variety of authors on antisemitism and related forms of intolerance racism and xenophobia Starting from the idea that antisemitism constitutes a paradigm case of collective and individual hatred the book examines some of the reasons why it has prospered over the ages and persists in our time even after well nigh universal condemnation of the Holocaust Some authors see it as a virus always ready to develop and spread wherever Jewish difference is resented Others emphasize that the antisemitic myths are not grounded in reality but depend rather on a fabrication an imagined being to whom every kind of vice and perversion can be attributed Jews Gypsies Kurds Armenians Tutsis they can all be made to fit the bill Simon Wiesenthal believed not in vengeance but in justice for the victims and played a pre eminent and at times lonely role in tracking down individual criminals and bringing them to trial But he knew that was not enough The contributors to this memorial volume representing a range of cultural religious and disciplinary perspectives share that view They know that so long as the Jewish stereotype is vested with legitimacy the fight against antisemitism can never be won Nor can it be defeated so long as it is fuelled by crisis in the Middle East which has allowed some people to give expression to their antisemitism while denying it by treating the State of Israel not as a state with its own particular problems and shortcomings but as a kind of reified Jew These are some of the issues addressed by the authors and essays presented along with others such as antisemitism as a determinant of Jewish identity and the possibility of forgiveness for the perpetrators of genocide The book thus seeks to understand and learn from this particular paradigm of hatred and to suggest ways of countering it in the name of the core values of a common humanity Winner of the 2007 National Jewish Book Awards in the category of Anthology
